PREFACE

I saw some of the Kākatīya monuments of Telingāna and Rāyalasīma during the course of my survey of Kākatīya inscriptions as a Research Student in the Indian History and Archaeology Department of the Madras University, between 1928 and 1930. After the publication of part of my monograph entitled The Kākatīyas of Warangal, I wanted to publish the remaining part also adding a chapter on the monuments of the Kākatīya period. I prescribed to one of my Research Students in the Osmania University the study of Cāļukyan and Kākatīya temples of Telingāṇa in 1956 and surveyed a few Kēkatīya temples. But my attention was diverted to the study of the Sātavāhana coins in various museums and private collections and I was busy with this work till 1958. I left Hyderabad in 1959 and could not resume my work on the Kākatīya monuments.

After joining the Sri Venkatesvara University, Tirupati, as Professor of History, I started a more ambitious scheme, the survey of the temples of Āndhradés'a. I surveyed the Eastern Cāļukyan and Early Cāļukyan temples and prepared two monographs on these temples which have been published by the Archaeological Department of Āndhra Pradesh. I then surveyed the temples of Śriśailam and prepared a monograph which is to be published by the same department. Another monograph on the temples of Kalinga has been published and another, entitled the Śaivite Deities of Āndhradēśa, is under publication by the Sri Venkatesvara University. I was able to find time during the summer vacation of 1964 to devote my attention to the Kākatīya monuments.

Company of

I have included in this monograph detailed descriptions of the temples of Hanumakonda, Warangal. Pālampēta, Ghanapūr, Kaṭāchpur. Jākāram, Panagal, Tripurāntakam and Pillalamarri. There are many more Kākatīya temples in Telingāṇa which require attention. I have given, in the Appendix a list of these temples about which I could obtain information. The temples selected by me are representative of the Kākatīya style of architecture. I have discussed, in a separate section at the end, the main features

of this style. I hope to discuss these features further, comparing them with the Later Celukyan and Hoysala styles, in my forth-coming book, entitled The Art and Architecture of Anahradesa.

I am grateful to Dr. V. C. Vamana Rao, M.A., Ph D. (Dublin), the Vice-Chancellor of the Sri Venkatesyara Un versity, for kindly sanctioning the funds required for the publication of this monograph. The Director-General of Archaeology in India has kindly permitted me to re-produce some of the picture post-cards published by his department. The Superintendent of the S. E. Circle of the Archaeological Surrvey of India and the Director of Archaeology, Andhra Pradesh, have given me all the facilities needed during the course of my survey of the monuments under their respective jurisdictions. Sri R. C. Gurumurti, the former Archaeological Care-taker at Warangal, accompanied me during the course of my survey of the monuments at Warangal and its neighbourhood and was of great help. Miss. A. Suryakumari. M.A., Research Assistant in my department and my former pupil. has prepared the plans of temples included in this monograph. Sri V. Kamesvara Rao, M.A., Tutor in my depart hent and a former pupil of mine, helped me in correcting the proofs. The Bhāratī Vijayam Press, Madras, evinced keen interest in the printing of this monograph.

I express my sincere thanks to all these officials and friends.

Sri Venkatesvara University, Tirupati, 10th January, 1966.

I. THE TEMPLES OF HANUMAKONDA

Hanumakonda is a flourishing town situated six miles from Warangal, the headquarters of a district of that name in the Telingana part of Andhra Pradesh. This town once enjoyed great renown as the earlier capital of the imperial Kākatīya dynasty. It is surrounded by a number of hills which must have added to its strength and security in the old days

According to one tradition, two brothers, named Anumadu and Kondadu. founded this township. The present name, Hanumakonda, is a corruption of the name Anumakonda or Anmakonda which figures in the inscriptions. It is possible that having been a popular Jaina centre, as indicated by the traditional accounts and numerous Jaina sculptures on the hills round the old citadel, it was originally named Ambako da, after one of the Jaina S'asanadevis and that the name came to be corrupted subsequently into Ammakonda and Anmakonda. It is known as Anamakondapura in the Kakatiya records The place seems to have enjoyed considerable importance in the 9th and 10th centuries A.D. for, an inscription recording gifts of money made by Mahāsāmantādhipati Satyāśraya Bhīmarasa a subordinate of the Rāstrakuta king, Amoghavarya, has been found at Kazipet, near Hanumakonda.(1) Subsequent to the fall of the Rastrakutas in the last quarter of the 10th century, the Anumakonda region was annexed by the Western Cālukyas. During the reign of Trailokyamalla Someśvara I, this region was being governed by minor chieftains like Kodavarti Dugga who governed Purakotapura and Gonna. Prola I (1030-1075), the first ruler of the Kakatiya family, who was then master of the Koravi region in the Warangal district, defeated these minor rulers and obtained the Anmakonda-vi aya as a fief from the Calukyan emperor(2). Thereafter, he seems to have shifted to Anmakonda and made it his capital. This town enjoyed that status till Rudradeva, the fifth ruler of the Kākatīya family, made Warangal the joint capital.(3) This monarch's nephew, Ganapatideva, finally made Orugallu or Warangal the permanent capital.

^{1.} Kannada Inscriptions in Andhra Pradesh, Wg. 18.

^{2.} M. Rama Rao - Kakatiyasamchika App. Ins. 1.

^{3.} Ibid p. 12.

The old citadel of Anmakonda can still be seen a little distant from the modern town. There is a wide gap in a chain of hills here with two big hills and two small hillocks. These hills and hillocks have been joined by high mud walls so as to form a secure fortress. There is a stone gateway leading into this citadel with a hill on either side. There are two hillocks to the left joined by a mud wall and a big hill known as the Padmākṣī hill to the right also connected with a mud wall. Opposite this gateway is another, situated in another mud wall. There are two temples in this citadel, the Padmākṣī temple and the temple of Siddhēśvara.

Inscriptions supply interesting information about the rulers of Anmakonda and the temples that existed in this town:—

- (1) Gifts of money were made to some local temple by Mahāsāmantādhipati Satyāśraya Bhīmarasa, a subordinate of the Rāṣṭrakūṭa king, Amōghavarṣa.(1)
- (2) 1n. S. 1001, on the occasion of a solar eclipse, Mahāmaṇḍalēśvara Bēta II gifted 10 mārtus of land to god Prolēśvara, obviously set up by him, in the name of his father, Prola I, in the temple of Bētēśvara, built by himself. (5)
- (3) Bēta II, son of Prola I, built a temple named after himself and excavated a *tīrtha* named S'ivapura and laid a garden in Anmakonda.(6)
- (4) Bēta II, a mahāmaṇḍalēsvara, a māhsēvara and the Lord of Anamakoṇḍa, gifted two tanks, named Kēsarisamudramu and Setti-kere, at the time of the installation of Varuṇa.(7)
- (5) In the year 42 of the Cāļukya Vikrama Era, Mailama, the wife of Pergade Bēta, the minister of king Kākati Prēla (II), built on the hill at Hanumakonda, a temple named the Kaḍalālaya Basadi. Mahāmaṇḍalēsvara Mēļarasa of Ugravādi, gifted land under a tank in Orugallu to this deity. Pergade Bēta, was the son of

^{4.} KIAP., Wg. 18.

^{5.} Corpus of Telingana Inscriptions, no. 6.

^{6.} Ibid no. 7.

^{7.} Ibid no. 5.

Yakapabbe and Vaijadandādhinātha, a minister of Prola's father, Bēta II.(8)

- (6) Bēta II created S'ivapura to the south-west of Anama-koṇḍa. His son, Prola II, gifted in S. 1012, a village to Aliya Rāmēśvara paṇḍita, a Kālāmukha and the head of the Mallikārjuna-S'ilāmaṭha of S'riparvata. The Nakaram of the town of Anamakoṇḍa gifted a lamp to god Umā-Bētēśvara in the town.(*)
- (7) During the reign of Kākatīya Gaņapatidēva, the local merchant organisation gifted āyālu or taxes on various articles of merchandise to god Vīrabhadrēśvara of Anamakonda.
- (8) A certain Gōsagi Iśvaradēva installed in Rudréśvaram, Caturmukhadēva, Dēvī and Dēva, Umāmahēśvara and 1000 lingas and gifted 6 mādas and martus of land to these deities for the prosperity of his overlords, the Kākatīya kings. (11)

THE PADMÂKŞĪ TEMPLE

This temple is situated on a big hill to the north of the fortress of Anmakonda. A Kannada inscription, located before this shrine, mentions this temple as the Kadalalaya-basadi or the temple of Kadalalaya.

There is a small pond, known as the Padmākṣi-guṇḍam, at the foot of the hill. A flight of narrow steps goes up the hill from this pond to the temple. The shrine on the hill consists of the Garbhagṛha and a small manṭapa before it. The vimāna above the temple is a narrow stepped pyramid with a square sikhara. There is no image in the centre of the Garbhagṛha but on the rock to the left inside are to be found the figures of a Jaina Tīrthankara and his yakṣa and yakṣiṇī who is now being worshipped as Padmākṣī.

It is not known how the goddess Kadalalaya, for whom this shrine was originally built, came to be known as Padmaksi.

^{8.} KIAP, Wg. 15

^{9.} CTI no. 12.

^{10.} Ibid no. 14

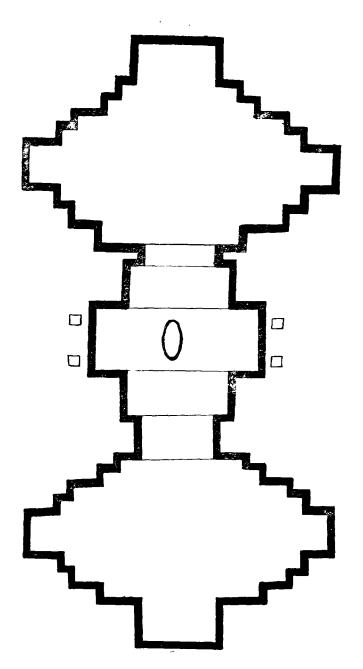

^{11.} Ibid no. 4

There is no similarity in the names. According to one view(15) this Padmāksī may be identical with Ambā or Padmāvatī, two S'asandevis of the Jaina pantheon. The Padmaksi of today has two arms. Ambā or Ambikā, the S'asanadēvi of the 22nd Tīrthankara, must have Simhalanchana and four hands holding a bundle of mangos in the right hands and an ankusa and a child in the left hands. So the Padmaksi of today cannot be identified with Ambā or Ambikā. Padmāvatī is the Sasanadevī of Parsvanatha. the 23rd Tirthankara. She must have the Hamsa-lanchana and four hands. According to the Digambara Jaina tradition, there ought to be five serpent hoods above her head, while according to the Svētāmbara tradition her vehicles are Kukkuta and Sarpa and she must hold lotus and $p\bar{a}sa$ in the right hands and fruit and ankusa in the left hands.(12) The Padmaksi of today does not confirm either to this description of Padmavati. That the shrine was the basadi of Kadalālaya built by Mailama in the reign of Prola II cannot be denied because the concerned inscription is opposite the shrine and also because very near the inscribed slab and on the rock are to be found the figures of a man and a woman to the right of a figure of Parsvanatha and because in all probability these figures represent Mailama and her husband, Pergada Beta. It is possible that the original idol of Kadalalaya was removed from this shrine.

It has been suggested above that the town was originally named Ambakonda. In that case, the hill on which this shrine is located must have been known as Ambakonda and the deity in the shrine must have been Amba. This leads to some reasonable This S'āsanadēvi, Ambikā, was also known as inferences. Kusmandını. According to one late inscription a Kūsmānda creeper issued a son by the grace of Kākatī, the para-sakti. This son and his descendants came to be known as the Kākatīyas. The Prataparudriya of Vidyanatha states that Kakati was the name of Durgā. The goddess Kākatī was the tutellary deity of the Kākatīyas and there was a famous temple of this deity in the city of Warangal. The early Kākātīyas who ruled from Anmakonda as their capital had the title Kākatipura-Varādhīsvara or Lord of the town of Kākati. It follows from this that Anmakonda had the alternative name of Kākatipura. Taking all these facts together it may be surmised that the Kadalalava and the

^{12. 1.}A. XXI, p. 257

^{13.} Ibid 1903, p. 459 and 1927 p. 20.

The triple shrine—Hanumakonda (to face p. 5.)

Kākatī of the inscriptions may be identical and that the Kākatīyas adopted Ambā or Kūşmāṇḍinī or Kaḍalālaya, the S'āsanadēvī of the Jainas as their tutellary deity, identified her with Durgā, so as to suit their Hindu persuasion and worshipped her as Kākatamma.

THE THOUSAND PILLARED TEMPLE

This is the principal temple of Hanumakonda and is situated at the end of the town. It faces the south and is in two sections - a triple shrine in the north and a mantapa in the south with a narrow platform connecting the two.

The Compound:—This temple is enclosed by a big compound of low walls built of large blocks of stone rivetted into each other. The main entrance is in the east and contains a mantapa of two pillars. Adjacent to it is a granite pillar containing the well known inscription of Kākati Rudradēva recording the date of the construction of the temple. This Kākatīya king led a series of successful expeditions, defeated a number of rival chieftains and extended his kingdom up to Kalyani in the west, the Malyavanta hill in the north, the sea in the east and Śrīśailam in the south. He raised this temple to gods Rudra, Vāsudēva and Sūrya as a token of his gratitude and as a symbol of his great victories. There is a big well with steps in the north-eastern corner of the compound. There is a second entrance in the north. About the middle of the west wall of the compound is a mantapa with two pillars in the front. There is another opening in the south now serving as the main entrance for the visitors.

The Plan of the Temple:—This temple is on a double platform and consists of a central mantapa or hall with three shrines (Pl. I-1), the Rudrēs'vara to the west, the Vāsudēva to the north and the Sūrya to the east (Pl. I-2) and an entrance porch in two sections to the south (Pl. II-1). The plan is of the star shape with several angles and returns.

The Upapītha:—The Upapītha, the lowest member on the elevation, is mostly buried in the ground and is visible in its entirity only in a few places. It is 4 8" high and contains upāna, paṭṭa, vājana, paṭṭa, gaļa cut into compartments decorated with four petalled lotuses, paṭṭa, dvipaṭṭa, three paṭṭas, narrow gaļa

and $\bar{a}lingapttik\bar{a}$. The top of this $Upap\bar{\imath}tha$ constitutes a pradakṣiṇa, 9' wide.

The Adhistāna:—This member, which constitutes the upper platform, is 3' 5" high and consists of upāna, paṭṭa with a semicircular projection at the end, moulding, paṭṭa, gala, three paṭṭas, dvipaṭṭa, two paṭṭas, gala, and āliṅgapaṭṭkā.

The Porch:—This porch is in the south and leads into the Mukhamaṇṭapa or hall and is in two sections, one lower and the other higher, with a flight of steps in the middle. The lower section has four pillars, two in the front and two at the back. Each of the front pillars has the pāda in two sections with a semicircular gable on each face, a thick rectangular block, narrow deep recess, two narrow paṭṭas, a wide part with creeper decorations in compartments, a wide round recess, narrow paṭṭa, a wide band with lotus decoration in eight sections, a narrow paṭṭa, wide round recess, paṭṭa, narrow recess, paṭṭa, a stout square block, narrow recess, paṭṭa, simhalalāṭa on each face, part like an inverted bell, narrow paṭṭa, a semicircular part, lotus, square phalaka and the capital with a roll at the end having a lotus leaf hanging below.

Each back pillar has a stout rectangular block, narrow recess, two pattas, wide part in eight sections with creeper design on each, wide recess, narrow patta, wide patta, narrow patta, wide recess, part in eight sections each containing two fruits and one leaf, two leaves, two narrow pattas, wide patta, recess, wide rectangular block, part like an inverted bell with semicircular elevation on each face, three pattas, a wide round part, lotus, phalaka and capital with roll and leaf.

The underside of the ceiling outside the pillars is cut into narrow compartments by vertical and horizontal rafters. There is a lotus bud at each angle and a row of buds on the underside of the edges. The underside of the ceiling above the pillars has a triple lotus with a bud in the centre. There is a triple lotus in the centre on the underside of the front and back horizontal beams.

The four pillars in the rear part of the porch which is higher, are all alike. Each of them has a rectangular block, recess, patta, recess, part in eight sections each decorated with the creeper and Srīvatsa designs, round gaļa, wide moulding, round gaļa, paṭṭa,

part in eight sections with decorations, plain patta in eight sections, round recess, round moulding, round recess, part in eight sections with bead decorations, three pattas, recess, patta, stout rectangular block, recess, patta, recess, patta, semicircular elevation on each face, round part with bead decoration all round, recess, round moulding, recess, round moulding, phalaka and roll and leaf capital.

Beyond this porch there is a low $v\bar{e}d\bar{i}$, $3\frac{1}{2}$ high on the adhistāna supporting the pillars, each 10'4" high on the roof. The inner side of the base of this $v\bar{e}d\bar{\imath}$ is cut into compartments by short pilasters, each compartment containg a lotus of four petals. The outer side of the vedi is in two sections, the bottom one narrow and the top one broad, both cut by short pilasters into compartments each containing a lotus of four petals. Above that part of the ved? which connects the hind pillars of the higher section of the porch and the side shrines, there is a slanting slab used for resting the back. The outer side of this slab is decorated with a horizontal row of six miniature vimanas. Each of these vimanas is in two sections, one projecting from the other. The prastara of each of them contains five broad horizontal bands, each marking a tala or storey surmounted by a round Sikhara and kalasa. There is a lotus between each pair of vimānas. Above this row of vimanas is another part containing pilasters and lotuses in compartments. Above this is a band containing four petalled lotuses.

The shrine of Sūrya (Pl. II-2):—The base of the walls of this shrine which are above the adhistāna and are 14'8" high contains from bottom to top, a broad patta, wide gala in four sections projecting from each other, another broad patta, recess cut into compartments each with a lotus inside, moulding in three sections each projecting from the other, and with a semicircular elevation in the centre and the base of projection above in two parts separated by a recess with a block in the centre containing an inverted Srīvatsa symbol. Above this is the wall proper.

The South Wall:—This wall is decorated as follows from west to east:—

(a) Projection with a pilaster surmounted by a miniature vimana of five flat receeding bands, each marking a tala, a central conical band reaching up to the phalaka, gala, round Śikhara and kalasa.

- (b) Recess with a miniature vimana as above containing five talas.
- (c) Wide projection with a $k\bar{o}sta$ of two pilasters. Inside it is a deity standing in samabhanga with four hands and a snake curled behind him with its hoods spread above the head. There is a plain $kap\bar{o}ta$ above the $k\bar{o}sta$ and above it are three miniature $vim\bar{a}nas$. Of the two $vim\bar{a}nas$ on the sides, one has seven talas and the other twelve talas. Both have $\bar{a}malaka$ sikharas. The central $vim\bar{a}n\bar{a}$ is in two storeys each with a deity inside. This shrine has a $N\bar{a}gara$ sikhara (Pl. III-1.)
- (d) Recess with a miniature vimāna of five talas and round sikhara on a pilaster.
- (e) Projection with a pillar containing a deity figure at the base.
- (f) Recess with a miniature vimāna of five talas on a pilaster.
 - (g) Projection with a pillar.
- (h) Recess with a miniature vimāna of eight talas and Nāgara sikhara on a pilaster.
 - (i) Projection with a pillar.
- (j) Recess with a miniature vimāna with round sikhara on a pilaster.
- (k) Wide projection with a miniature shrine. This shrine has a low parapet in the front at the base, double pillars on the sides and a flat projecting kapōta. Above the kapōta is a row of three miniature vimānas. The vimānas on the sides have an āyatāsra part surmounted by an āmalaka sikhara and a conical central band. The central vimāna has eight talas surmounted by an āmalaka sikhara, and a conical central band decorated with the creeper design. The underside of the ceiling inside the shrine contains a double lotus with a bud in the centre The outer side of the low parapet before the shrine is decorated with a row of lions, elephants, swans, pūrṇakalasas and women in dance poses. Below the parapet there is an inverted Śrīvatsa symbol and below it a miniature vimāna with āmalaka sikhara.
- (1) Recess with a miniature vimana on a pilaster (Pl. III-2).

- (m) Projection with a pillar.
- (n) Recess with a miniature vimāna of eight talas surmounted by an āmalaka sikhara, on a pilaster.
 - (o) Projection with a pillar.
- (p) Recess with a miniature vimāna of eight tālas surmounted by a Nāgara sikhara on a pilaster.
- (q) Projection with a pillar with the figure of Sūrya at the base.

The east wall:—This wall is generally similar to the south wall. It is decorated as follows:—

- (a) Projection with a pillar with the figure of Surya at its base.
- (b) Recess with a miniature vimāna of eight talas on a pilaster.
- (c) Projection with a pillar containing a sculpture at its base, now worne out.
- (d) Recess with a miniature vimāna of seven talas and an āmalaka sikhara and conical band on a pilaster.
- (e) Projection with a pillar with a sculpture at its base now worne out.
- (f) Recess with a miniature $vim\bar{a}na$ on two slender pilasters with a flat $kap\bar{o}ta$ having $makaramukh\bar{a}s$ at the ends and a surmounting $N\bar{a}gara$ sikhara of the distended type.
- (g) Broad projection with a miniature shrine. There is a low parapet in front of the shrine at the base decorated with compartments containing the figures of a horse with the forelegs raised, two lotuses, a human figure, Pūrṇakalasa, siṁhalalāṭa, horse, lion with the forelegs raised and a running elephant. There are double pillars supporting a plain projecting kapōṭa. Above the kapōṭa is a horizontal block with a makaramukha on either side surmounted by an āyatāsra sikhara with a row of three kalasas above it. In the portion above this are three miniature vimānas. One side vimāna has six talas and a round sikhara and the other is round from bottom to top. The central vimāna has an āyatāsra sikhara.

- (b) Recess with a miniature vimana as above containing five talas.
- (c) Wide projection with a $k\bar{o}sta$ of two pilasters. Inside it is a deity standing in samabhanga with four hands and a snake curled behind him with its hoods spread above the head. There is a plain $kap\bar{o}ta$ above the $k\bar{o}sta$ and above it are three miniature $vim\bar{a}nas$. Of the two $vim\bar{a}nas$ on the sides, one has seven talas and the other twelve talas. Both have $\bar{a}malaka$ sikharas. The central $vim\bar{a}n\bar{a}$ is in two storeys each with a deity inside. This shrine has a $N\bar{a}gara$ sikhara (Pl. III-1.)
- (d) Recess with a miniature vimāna of five talas and round sikhara on a pilaster.
- (e) Projection with a pillar containing a deity figure at the base.
- (f) Recess with a miniature vimāna of five talas on a pilaster.
 - (g) Projection with a pillar.
- (h) Recess with a miniature vimāna of eight talas and Nāgara sikhara on a pilaster.
 - (i) Projection with a pillar.
- (j) Recess with a miniature vimāna with round sikhara on a pilaster.
- (k) Wide projection with a miniature shrine. This shrine has a low parapet in the front at the base, double pillars on the sides and a flat projecting kapōta. Above the kapōta is a row of three miniature vimānas. The vimānas on the sides have an āyatāsra part surmounted by an āmalaka sikhara and a conical central band. The central vimāna has eight talas surmounted by an āmalaka sikhara, and a conical central band decorated with the creeper design. The underside of the ceiling inside the shrine contains a double lotus with a bud in the centre The outer side of the low parapet before the shrine is decorated with a row of lions, elephants, swans, pūrṇakalasas and women in dance poses. Below the parapet there is an inverted Śrīvatsa symbol and below it a miniature vimāna with āmalaka sikhara.
- (1) Recess with a miniature vimāna on a pilaster (Pl. III-2).

- (m) Projection with a pillar.
- (n) Recess with a miniature vimāna of eight talas surmounted by an āmalaka sikhara, on a pilaster.
 - (o) Projection with a pillar.
- (p) Recess with a miniature $vim\bar{a}na$ of eight $t\bar{a}las$ surmounted by a $N\bar{a}gara\ sikhara$ on a pilaster.
- (q) Projection with a pillar with the figure of Sūrya at the base.

The east wall:—This wall is generally similar to the south wall. It is decorated as follows:—

- (a) Projection with a pillar with the figure of Sūrya at its base.
- (b) Recess with a miniature vimāna of eight talas on a pilaster.
- (c) Projection with a pillar containing a sculpture at its base, now worne out.
- (d) Recess with a miniature vimāna of seven talas and an āmalaka sikhara and conical band on a pilaster.
- (e) Projection with a pillar with a sculpture at its base now worne out.
- (f) Recess with a miniature *vimāna* on two slender pilasters with a flat *kapāta* having *makaramukhās* at the ends and a surmounting *Nāgara sikhara* of the distended type.
- (g) Broad projection with a miniature shrine. There is a low parapet in front of the shrine at the base decorated with compartments containing the figures of a horse with the forelegs raised, two lotuses, a human figure, Pūrṇakalasa, sinhalalāṭa, horse, lion with the forelegs raised and a running elephant. There are double pillars supporting a plain projecting kapōta. Above the kapōta is a horizontal block with a makaramukha on either side surmounted by an āyatāsra sikhara with a row of three kalasas above it. In the portion above this are three miniature vimānas. One side vimāna has six talas and a round sikhara and the other is round from bottom to top. The central vimāna has an āyatāsra sikhara.

- (h) Recess with a miniature vimāna of eight talas and āmalaka šikhara on a pilaster.
- (i) Projection with a pillar in three sections with the central section containing a simhalalāṭa.
- (j) Recess with a miniature *vimāna* of eight *talas* containing a round *sikhara* with creepers emanating out of it and a central conical band with a gable at its base, on a pilaster.
- (k) Projection with a pillar with its central and top bands decorated.
- (1) Recess with a miniature vimāna, on a pilaster, with seven talas and an āmalaka sikhara.
- (m) Projection with a pillar with the figure of Surya at its base. The portion above this figure contains a simhalalāṭa, lotus flowers and pūrņakalasa with a creeper emanating from it.

The North Wall:—This wall is generally similar to the south and east walls and contains the following decorations:—

- (a) Projection with a pillar with the figure of Surya at its base.
- (b) Recess with a miniature vimāna of nine talas surmounted by an āmalaka šikhara on a pilaster.
 - (c) Projection with a pillar.
- (d) Recess with a miniature vimāna of seven talas surmounted by an āmalaka šikhara, on a pilaster.
 - (e) Projection with a pillar.
- (f) Recess with a miniatue vimāna on a pilaster with an āmalakā sikhara.
- (g) Projection with a miniature shrine. There is a low parapet in the front with its outer side decorated with the figures of elephants, lions and humans. There are double pillars supporting a piain, projecting kapōta. Above the kapōta is a horizontal vimāna of eight flat talas, and a conical band in the centre with creeper design on it. There is no sikhara or kalasa. Below this shrine is a miniature vimana with an āmalaka sikhara. Below it is a band containing an elephant in the centre and a lotus on either side. Below this is the somasūtra jetung out.

- (h) Recess with a miniature vimana on a pilaster, with seven talas and āmalaka sikhara.
 - (i) Projection with a pillar.
- (j) Recess with a miniature vimāna on a pilaster, with eight talas and āmalaka sikhara.
 - (k) Projection with a pillar.
- (1) Recess with a miniature vimāna with high gaļa and round sikhara.
- (m) Projection with a pillar having the figure of $S\bar{u}$ rya at its base.
- (n) Recess with a miniature vimāna, on a pilaster with seven talas and āmalaka sikhara.
- (o) Projection containing a niche. The outerside of the parapet in front of this niche is decorated with the figures of lions and humans. There is one pillar on each side supporting a plain flat kapōta, and three miniature vimānas above it, those on the sides containing five talas and the central one seven talas. There is a surmounting āmalaka sikhara. The niche contains a figure of Sūrya inside. Below this Kōṣṭa or niche there is a miniature vimāna of four talas crowned by an āmalaka sikhara. Below this miniature is a smaller niche on two pilasters containing the figure of Sūrya with a woman on either side.
- (p) Recess with a miniature vimāna of eight talas and āmalaka šikhara on a pilaster.
 - (q) Wall part decorated with three pilasters.

Roof:—There are many projections and returns in the roof corresponding to those on the wall below. The roof projects two feet from the walls and its underside is plain.

Interior - Entrance of the Antarāla:—The entrance of the Antarāla of this shrine is in three sections, the doorway in the centre and one section on each side, each consisting of wall space, pillar, empty space and pillar. The wall space on either side contains from bottom to top a rectangular block, recess, narrow paṭṭa, broad paṭṭa, empty space, creeper design between two paṭṭas, empty space, empty space between two paṭṭas, moulding with a semi-circular elevation, paṭṭa, recess, paṭṭa, dvipaṭṭa, recess, paṭṭa, dvipaṭṭa, recess, paṭṭa, dvipaṭṭa, recess, paṭṭa, dvipaṭṭa, recess, paṭṭa, recess, paṭṭa,

its base in two projecting sections with pūrnakalasa in the centre, a rectangular block, recess, patta and recess joined by a semicircular projection, one broad patta with a square containing the Śrīvatsa symbol, patta with a row of lotuses, square with the Śrīvatsa symbol, a plain square, moulding, a curve in the centre, recess, dvipatta, dvipattakumuda, recess, patta, dvipāttakumuda, gala, lotus and capital with the roll ornament and a hanging leaf on the underside. Then there is empty space and next to it another pillar. This pillar has at its base the figure of a woman standing in the bhujangatrāsa pose with a prabhā behind. Above are a band with leaf and bud decoration, a round recess, moulding, round recess, wide band with eight faces each with a lotus, narrow recess, moulding with lotus decoration, round recess, band with pearl string decoration, square block with leaf and pearl string decoration, moulding, recess, round moulding, band with pearl string decoration, two mouldings, lotus, phalaka with lotus decoration on the underside and capital with roll and leaf on the under side. The section to the left of the entrance is similar.

The $p\bar{a}di$ or base piece of the entrance has three projections each containing a two storeyed miniature shrine with round sikhara and kalasa. The beam above the two central pillars is finely carved. The underside of this beam contains four lotuses, one inside the other, with a bud in the centre on either side and a single lotus half open in the centre.

The architrave above has a fine representation of Gajāsura-samhāramūrti. There are two makaras, one at each extremity from whose mouths issues a creeper forming six arches. Beyond is a wide creeper design. There is a four handed rider on each makara with another figure behind. The space between the makaras contains three women on each side in dance poses. Between them is S'iva as mentioned above. The god dances in the Lalita pose with two hands holding trisūla and kunta and one left hand holding a long object. He is decorated with kirīṭa, makarakuṇḍalas, graivēyaka, hāra, long stout yajñōpavita, broad girdle and Pūrṇōruka.

Antarāla:—There are two miniature shrines on the two side walls of the Antarāla. Each has a projecting base, two pilasters, a projecting kapōta and a wide vimāna above in five sections emanating from one another, containing twelve talas, with a

gable at the base of the central section, crowned by an āmalaka sikhara.

Entrance of the Garbhagṛha:—This is in six sections on each side of the dvāra. The first section is the wall part with three rows of the Śrivatsa symbol and creeper design. The second is a projection containing a vertical band with an elephant at the base and sixteen lions above with forepaws raised. Next is a recess with lotus leaf decoration. Adjacent to it is a projection with vertical rows of lions in circles. Next is a vertical band of musicians, drummers and dancers. Then there is a recess with leaf decoration. Next is a pillar decorated with the leaf motiff and pearl hangings. Adjacent is a band with leaf decoration. Next is another band with a vertical row of women seated and holding a double string of pearls above their heads. Next is the wall portion with lotus leaf decoration.

The verticals of the dvāra are adorned with the lotus and kalasa motiff. The upper beam has in the centre a lintel carved like a miniature shrine with Gajalakṣmī inside. On either side of the lintel is a row of women holding strings of pearls. The underside of this beam contains a treble lotus with a bud in the centre.

There are fine sculptures on the base of the jambs. Each base contains the figures of (a) a man holding up a cāmara (b) a cāmaravāhinī, (c) S'iva with four hands standing in dvibhanga (d) female deity holding flower in the left hand (e) standing deity figure with four hands and (f) cāmaravāhinis.

The padi or base piece, has a projection in the centre containing a shrine in three sections projecting from one another. The upper beam is in three projections with a row of lotus buds hanging on the under side. There is a canopy above the jambs similarly decorated. There is a moon stone before the padi carved in the shape of a lotus creeper with buds shooting out at the ends.

Garbhagṛha:—There are four pilasters at the four corners in the interior of this structure. There is a long projecting plank along each of the two side walls and a finely carved canopy projecting from the back wall, above the linga on $v\bar{e}d\bar{\imath}$ in the centre.

THE VASUDEVEŠVARA SHRINE

The architrave above the entrance of the Antarāla of this shrine contains a fine figure of Viṣṇu-Narasimha in the Bhujangatrāsa pose. This shrine has therefore to be identified as that of Vāsudēvēsvara mentioned in the local inscription.

This shrine is similar to the other two in respect of plan and construction. Its description is as follows:—

The East Wall (Pl. IV-1):—This wall is in seventeen sections as described below:—

- (a) Wall space with three shallow pilasters.
- (b) Recess with a miniature vimāna of eight talas and round sikhara on a pilaster.
- (c) Projection with a niche containing a figure of standing Viṣṇu inside. The god holds samkha in the upper right hand gadā in the upper left, Padma with stalk in the lower right and cakra in the lower left. He is decorated with cakrakuṇḍalas, three graivēyakas, broad girdle and long yajñōpavīta. Above the niche is a row of three miniature vimānas each of seven talas crowned by a round sikhara.
- (d) Recess with a miniature vimāna of eight talas and round sikhara on a pilaster.
- (e) Projection with a pillar containing at its base the figure of Vișnu standing.
- (f) Recess with a miniature Vimāna on a pilaster with talas and round sikhara.
 - (g) Projection with a pillar.
- (h) Recess with a miniature vimāna on a pilaster with eight talas and round sikhara.
 - (i) Projection with a pillar.
- (j) Recess with a miniature vimūna on a pilaster with eight talas and round sikhara.
- (k) Broad projection with a miniature shrine. There is a parapet before the shrine on either side of a central opening. The outer side of this parapet is decorated with the figures of lions, elephants and pūrņaka/ašas. There are double pillars on either side with a cross beam, the under side of which contains a

lotus. There is a projecting kapōta above adorned with lotuses and pearl hangings. The underside of the ceiling inside the shrine contains a lotus in saṭkōṇa. Above the shrine is a row of three vimānas each with a conical band in the centre and with eight talas and a round sikhara.

- (1) Recess with a miniature vimāna with eight talas and round sikhara on a pilaster.
 - (m) Projection with a pilaster.
- (n) Recess with a miniature vimāna of eight talas on a pilaster.
 - (o) Projection with a pilaster.
- (p) Recess with a miniature $vim\bar{a}na$ of eight talas on a pilaster.
- (q) Projection with a pilaster containing at its base a figure of Vispu.

The North Wall:—This wall contains the following decorations:—

- (a) Projection with a pilaster containing at its base the figure of Viṣṇu standing (Pl. IV-2),
- (b) Recess with a miniature vimāna of eight talas and round sikhara on a pilaster.
 - (c) Projection with a pilaster.
- (d) Recess with a miniature vimāna of eight talas on a pilaster.
 - (e) Projection with a pilaster.
- (f) Recess with a miniature vimāna of seven talas on a pilaster.
- (g) Broad projection with a miniature shrine. The low parapet in the front is decorated on the outer side with the figures of lotus, Hanuman, Rāma, two humans, and a linga on one side and pūrnakalaša, lotus, elephant and elephant with rider on the other. There are double pillars with roll and leaf capitals. There is a projecting kapōta decorated with lotuses and pearl hangings. There are three miniature vimānas above the kapōta, the central one being bigger. The side vimānas have seven talas each and the

;

central one nine talas. Below this shrine is a square block containing the figure of Garuda with a swan on either side.

- (h) Recess with a vimāna of seven talas on a pilaster.
- (i) Projection with a pilaster.
- (j) Recess with a miniature vimāna of a seven talas on a pilaster.
 - (k) Projection with a pilaster.
- (1) Recess with a miniature vimāna of nine talas on a pilaster.
- (m) Projection with a pilaster containing at its base the figure of Vișnu standing holding samkha, cakra, gadā and padma.

The West Wall:—The west wall contains the following decorations:—

- (a) Projection with a pilaster containing at its base the figure of Viṣṇu standing in samabhanga holding samkha, cakra, gadā and padma. Below in a square is Siva seated in padmāsana, holding damaru in the upper right hand, mṛga in the upper left and two round objects in the two lower hands.
- (b) Recess with a miniature vimāna of seven talas and round sikhara on a pilaster.
 - (c) Projection with a pilaster.
- (d) Recess with a miniature vimāna of seven talas and round sikhara on a pilaster.
 - (e) Projection with a pilaster.
- (f) Recess with a miniature vimāna of seven talas and round sikhara on a pilaster.
- (g) Broad projection with a miniature shrine. The outer-side of the parapet in the front contains the figures of an elephant and two lions in each of two sections. There are double pillars supporting a flat kapōta. There is a lotus in satkōṇa on the underside of the ceiling of the garbhagṛha. There are three miniature vimānas in a row above the kapōta, those on the sides containing six talas and the central one nine talas all with round sikharas.
- (h) Recess with a miniature vimāna of nine talas and round sikhara on a pilaster.
 - (i) Projection with a pilaster.

- (j) Recess with a miniature vimāna of seven talas and round sikhara on a pilaster.
 - (k) Projection with a pilaster.
- (1) Recess with a miniature vimāna of seven talas and āmalaku sikhara on a pilaster.
- (m) Projection with a pilaster containing at its base the figure of Visnu standing.
- (n) Recess with a miniature vimāna of seven talas and āmalaka sikhara on a pilaster.
- (o) Projection with a pilaster containing at its base a niche, with a pillar on either side, containing the figure of Viṣṇu standing holding samkha and gadā in the upper hands and padma and cakra in the lower hands.
- (p) Recess with a miniature vimāna of seven talas and round sikhara on a pilaster.
 - (q) Wall part with three pilasters.

Interior - Antarala entrance:—The entrance of the Antarala consists of four sections, all alike, on either side of the dvāra. The first section, which is the wal! part, contains seven horizontal bands, three mouldings and two recesses. Next is a pillar which has, from bottom to top, a rectangular block, two pattas, part with an inverted Śrīvatsa symbol, band with lotuses, band with inverted Srivatsa design, band with a conical projection in the centre, two mouldings, recess, patta in five faces, lotus, phalaka and capital with roll and leaf on the underside. Next is a section with a fretwork frame with 66 holes and creeper design on the frame. Then there is a pillar with a figure in the dvibhangā pose at the bottom, a band with Srīvatsa design, round recess, moulding with diamond cutting, round recess, wide band with diamond cutting. round recess, band with diamond cutting, round recess, band with pearl hangings, patta, recess, patta, recess, block with two pearl ornaments, patta, moulding with simhalalāta gable, recess, round moulding, recess, round moulding, round moulding with pearl hangings, recess, padma, and phalaka with pearl hangings.

The padi or base piece is in three sections, each containing a niche with $kap\bar{o}ta$ and round sikhara and the central section containing a $s\bar{a}l\bar{a}-k\bar{o}sta$.

The architrave above the entrance is finely carved. There is a two storeyed miniature shrine at each extremity with six pillars,

a standing deity inside in each storey, a $s\bar{a}l\bar{a}$ top and round sikhara. The underside of the cross beam contains five lotuses. Adjacent to the shrines in the interior are two makaras, with riders on, out of whose mouths issue a creeper forming six arches. There are three figures in dance poses before each makara. In the centre on a lotus is the figure of Nṛtta-Narasimha with a real lion's face (Pl. V-1). He is in the $Bhujangatr\bar{a}sa$ pose with the right leg resting on a lotus. He has eight hands and a wide open mouth and is adorned with $kir\bar{\imath}ta$, $graiv\bar{\imath}yakas$, $h\bar{a}ras$, long $yaj\bar{n}\bar{o}-pav\bar{\imath}ta$ and wide girdle.

Antarāla:—There are two miniature shrines, one in the north wall and the other in the south wall, of the Antarāla. There is a low platform and two pillars in each decorated with roll and leaf capitals. There is a full lotus on the underside of the ceiling outside and lotus in satkoṇa on the underside of the ceiling in the interior of the shrine. There is a plain projecting cornice and above it is a wide miniature vimāna in five sections projecting from one another, with nine talas, three round sikharas and kalaša. There is a conical band in the centre of the face of the vimāna.

Garbhagṛha:—The bases of the jambs of the entrance of this structure are finely sculptured. There are four bold figures on each, two $c\bar{a}marav\bar{a}hinis$, Viṣṇu and one woman holding kalasa. The padi or base piece is in three projecting sections. There is a moon stone on the ground carved like a lotus creeper with buds hanging in the corners. The lintel on the upper beam has the figure of Gajalakṣmī while the part on either side is decorated with diamond cuttings. In the interior of the Garbhagṛha along the side walls are two projecting planks. There is a canopy above the $v\bar{v}d\bar{t}$ in the centre, projecting from the back wall. Near the top of each wall there is a band containing lotuses. There are four pilasters in the angles of the walls.

THE RUDRÉS'VARA SHRINE

This shrine faces the east and is situated opposite the shrine of Surya (Pl. V-2). The outer side of its walls is decorated as follows:—

North wall:-This wall is decorated as follows:-

(a) Wall part with a projection containing a pillar.

- (b) Recess with a miniature vimāna on a pilaster with seven talas and āmalaka sikhara.
 - (c) Projection with a pillar.
- (d) Recess with a miniature vimāna on a pilaster with eight talas and āmalaka sikhara.
- (e) Projection with a pilaster containing at its base a $k\bar{o}s_{\dot{i}}a$ with the figure of Bhairava standing in dvibhanga, holding damaru in the upper right hand and $bhik_{\dot{i}}\bar{a}p\bar{a}tra$ with a skull hanging from it in the lower left hand. The deity wears a long $kap\bar{a}lam\bar{a}l\bar{a}$ reaching below the knees.
- (f) Recess with a miniature $vim\bar{a}na$ of seven talas and $\bar{a}malaka$ sikhara on a pilaster.
- (g) Projection with a pilaster containing at its base the figure of Siva standing in *dvibhanga*, holding *damaru* in the upper right hand, $tris\bar{u}la$ in the upper left and $gad\bar{a}$ in the lower left. There is a four handed deity in a square below this niche.
- (h) Recess with a miniature $vim\bar{a}na$ of seven talas and $\bar{a}malaka \ sikhara$ on a pilaster.
- (i) Projection with a pilaster below which is a square containing the figure of a man seated in padmāsana with both the hands in the lap and the hair knotted above the head.
- (j) Recess with a miniature vimāna of nine talas and āmalaka sikhara on a pillar.
- (k) Projection with a pilaster below which is a square containing the figure of a four handed deity, seated in padmāsana and holding damaru and trisūla in the upper hands and kalasa in the lower left hand and keeping the lower right in abhaya.
- (1) Recess with a miniature vimana of seven talas and āmalaka sīkhara on a pilaster.
- (m) Wide projection with a miniature shrine. There is no parapet before this shrine, but instead there is a wide band at the base adorned with the lotus and creeper design. There are two pillars on either side supporting a projecting kapōta decorated with pearl hangings. There are three miniature vimānas above it, each in three projecting sections. The side vimānas have seven talas, and an āmalaka sikhara. The central vimāna has seven talas and an āmalaka sikhara. All the vimānas have the central conical band with creeper design on it. There is a lotus on the underside

of the ceiling of both the front portion and the garbhagrha of the shrine.

- (n) Recess with a miniature vimāna of seven talas and āmalaka šikhara on a pilaster.
 - (ō) Projection with a pilaster.
- (p) Recess with a miniature vimāna of seven talas on a pilaster.
 - (q) Projection with a pilaster.
- (r) Recess with a miniature vimana of seven talas on a pilaster.
- (s) Projection with a pilaster containing at its base the nude figure of Bhairava standing in *dvibhaiga* holding *trisūla* in the upper right hand, *damaru* in the upper left, *khadga* in the lower right and bowl with a skull hanging from it in the lower left. Below this in a square is the figure of Bhikṣātanamūrti.

West Wall (Pl. VI-1):—This wall is decorated as follows:—

- (a) Projection with a pilaster containing at its base the figure of Bhairava standing in *dvibhanga* with an animal to left reaching something held in the hand of the god.
- (b) Recess with a miniature vimāna with seven talas and āmalaka sikhara on a pilaster.
 - (c) Projection with a pilaster.
- (d) Recess with a miniature vimāna of seven talas and āmalaka sikhara on a pilaster.
 - (e) Projection with a pilaster.
- (f) Recess with a miniature $vim\bar{a}na$ of seven talas and $\bar{a}malaka \ sikhara$ on a pilaster.
- (g) Wide projection with a miniature shrine. There is no parapet before this shrine. There are double pillars supporting a projecting kapōta and three miniature vimānas above it, each in three projecting sections. Each of them has five talas and a round sikhara.
- (h) Recess with a miniature vimāna on a pilaster. This vimāna is peculiar. It is conical and has two conical bands, one inside the other, in the centre of the face. There is a wide āmalaka in the place of the phalaka and a round sikhara above it.
 - (i) Projection with a pilaster.

- (j) Recess with a miniature vimāna of five talas and round sikhara on a pilaster.
 - (k) Projection with a pilaster.
- (1) Recess with a miniature vimāna of seven talas and round sikhara on a pilaster.
- (m) Projection with a pilaster with a two handed deity figure in dvibhanga at its base.

South Wall:—This wall is decorated as follows:—

- (a) Projection with a pilaster containing at its base the figure of a woman standing in *dvibhanga* holding a *kalasa* in the left hand.
- (b) Recess with a miniature vimāna of seven talas and round sikhara on a pilaster.
 - (c) Projection with a pilaster.
- (d) Recess with a miniature vimāna of seven talas and āmalaka sikhara.
 - (e) Projection with a pilaster.
- (f) Recess with a miniature vimana of six talas and amalaka sikhara.
- (k) Wide projection with a miniature shrine. There is no parapet before this shrine. There are double pillars on each side supporting the cornice, with the roll and leaf on the underside of their capitals. The verticals of the $dv\bar{a}ra$ are decorated with lotus design. There are two lotuses on the underside of the ceiling, one outside and one in the Garbhagrha.
- (h) Recess with a miniature vimāna of six talas and \bar{a} malaka sikhara on a pilaster.
 - (i) Projection with a pilaster.
- (j) Recess with a miniature vimāna of five talas and round sikhara on a pilaster.
 - (k) Projection with a pilaster.
- (1) Recess with a miniature vimāna of nine talas and Nagāra sikhara.
 - (m) Projection with a pilaster.
 - (n) Recess with a miniature vimāna with round sikhara.

- (o) Projection with a pilaster containing at its base the figure of Nṛtta-Gaṇapati in the Bhujāṅgatrāsa pose with one upper right hand in karihasta and another hanging, one upper left also hanging, the lower left holding mōdaka with the tip of the trunk resting on it and the lower right bent at the elbow and resting on the chest.
- (p) Recess with a miniature $vim\bar{a}na$ of eight talas and $\bar{a}malaka \ sikhara$.
 - (q) Projection with a pilaster.
- (r) Recess with a miniature vimāna of seven talas and round sikhara.
 - (s) Wall part projecting.

Interior-Antarala entrance:—There are five sections on either side of the dvāra, both alike. The first section contains wall space with a pillar, the second is a pillar, the third contains a fret work screen with twenty holes, and the fourth is a pillar. The jambs of this pillar are sculptured like those in the other two shrines.

The padi or base piece is in three projecting sections, those on the sides being decorated with lotuses. The upper beam has, in the centre of its under side, a big lotus with four lotus buds on either side. The front part of the beam is decorated with pearl hangings. The architrave above is finely carved. There is a makara at each extremity out of whose mouth issues a creeper forming six arches. Before each makara are three humans in dance poses. In the centre is Siva-Naṭarāja dancing in the Bhujangatrāsa pose.

Aistarāla:—In each side wall of the aistarāla, there is a miniature shrine containing two pillars on either side, jambs, dvāra, a plain projecting kapōta and a wide vimāna in three sections projecting from one another and with a conical band in the centre. It has eleven talas and a round sikhara. The shrine in the south wall has a row of three vimānas, a wide one in the centre and two on the sides narrow and conical.

Garbhagrha:—The entrance of the garbhagrha is as in the other two shrines. One vertical jamb contains floral decoration, another has two lotuses, one above the other, one has the lotus creeper design, another has the figures of soldiers with swords

and shields, and one has a vertical row of humans. The base of each jamb contains the figures of a chauri bearer and a woman, four handed S'iva, a cāmaravāhinī, S'iva with four hands, a cāmaravāhinī and a woman holding kalasa in one upraised hand.

Before the central part of the padi or base piece there are two raised squares and a moon stone. The upper beam of the $dv\bar{a}ra$ is decorated with diamond cutting and lotus leaf design. The lintel has been cut into a miniature shrine housing the figure of Gajalakṣmī. Above are two rows of seven semi-circular projections.

Inside the *Garbhagṛha* there is a finely carved $V\bar{e}d\bar{\imath}$ with a cylendrical linga on it. There are projecting planks along the side walls, and a pilaster in the four angles.

MUKHAMANTAPA

There is a big Mukhamantapa common to all the three shrines described above. It has a raised square 17'9" and 4" high in the centre between four richly carved pillars. Inside it is a circular part 2" high.

All the pillars (Pl. VI-2) are alike and each of them contains the pāda in five sections with a semi-circular elevation on each face, rectangular block, recess, paṭṭa, recess, paṭṭa, recess, band with creeper design, tripaṭṭa with diamond cutting in the centre and semi-circular elevation above and below, a round tripaṭṭa with diamond cuttings, semi-circular elevation, round tripaṭṭa with design, recess, paṭṭa, wide paṭṭa with diamond cuttings, three round tripaṭṭas, wide round band with pearl hangings, paṭṭa, recess, wide paṭṭa, recess, tripaṭṭa, recess, rectangular block, recess, tripaṭṭa, wide paṭṭa, circular moulding with a simhalalāṭa gable on each face, recess, five narrow round bands, band with pearl hangings, four narrow round bands, wide circular part, phalaka with pearl hangings, and roll and leaf capital.

The underside of the ceiling above the four central pillars contains four squares, one inside the other. There are twelve simhalalātas in the angles of the two outer squares and the eight dikpālakas round a circle inside the innermost square. This circle contains the figure of a deity seated in Vīrāsana with eight hands holding sword, khēta and Dhanus among others. There is a full lotus on the underside of each beam.

THE THOUSAND PILLARED MANTAPA

Opposite the triple shrine described above, there is a big mantapa, beyond a big nandi (Pl. VII-1), now without roof, locally known as the Thousand pillared mantapa. There is a low platform connecting the two structures.

Platform:—This platform is star shaped. It has two square projections in the north and south with a square part in the middle. There are two short flights of steps, one on either side of the northern projection which touches the outer portico of the triple shrine. There are two pillars, one on either side, at the north-eastern and north-western angles and two more at the south-eastern and south-western corners of the square part of the platform. There is a finely carved black granite nandi in the centre of the square facing the triple shrine.

The Mantapa:—This mantapa (Pl. VII-2) consists of an upapītha and adhistāna and three porches in the north, east and south. There is a narrow pillared verandah outside the mantapa proper connecting the three porches.

Upapītha:—This part consists of upāna, paṭṭa, gaļa cut into compartments each of which contains a four petalled lotus, broad paṭṭa, moulding, plain gaļa, paṭṭa, tripaṭṭa and ālingapaṭṭikā. There is a pradakṣiṇa, about 8' broad above.

Adhistāna:—This upper platform is very high and contains numerous parts like - upāna, paṭṭa, moulding, five paṭṭas, tripaṭṭa, three paṭṭas, dvipaṭṭa, paṭṭa, broad paṭṭa, three paṭṭas, narrow gaḷa, paṭṭa, dvipaṭṭa and ālingapattikā.

Porticos:-Each of the three porticos consists of a small open pial, originally containing a pillar and a low $v\bar{e}d\bar{i}$ or parapet beyond. This $v\bar{e}d\bar{i}$ is in two sections. The lower part in the front contains three compartments, that in the piece at right angles to it seven compartments and another at right angles to this five compartments, each compartment having a four petalled lotus with a bud in the centre. The piece connecting one portico with another contains six compartments similarly decorated. All portices are similar.

The upper section of the $v\bar{e}d\bar{\imath}$ in each portico contains a row of miniature $vim\bar{\imath}nas$. On each side of the north portice there are two sections, one on either side of the entrance, each having

fifteen and half $vim\bar{a}nas$. There are sixteen $vim\bar{a}nas$ in the south portico. There is no portico in the west and the upper part of its $v\bar{e}d\bar{\imath}$ contains thirty and half $vim\bar{a}nas$.

These miniature vimanas are of the following varieties:-

- (1) Wide *vimāna* in two sections, projecting from one another, with four *talas* and a conical band in the centre with round *sikhara*.
- (2) Conical vimāna of seven talas with a conical band in the centre and round sikhara.
- (3) Wide vimāna of seven talas in three sections and round sikhara.

There are twenty four pillars above the $v\bar{e}d\bar{i}$ in the porticos, some more and some less carved and each with a roll and leaf capital.

The Verandah:-This narrow verandah which runs on the four sides of the mantapa, contains a number of pillars. There are three pillars on either side of and two in the part at right angles to each portico.

Walls:—The walls of the mantapa are decorated. There are four entrances and two sections of the wall on either side of each entrance. In each of these sections are a pillar adjacent to the dvāra, empty space, a broad pilaster, recess with a miniature vimāna on a pilaster, a projection with a pilaster, recess with a miniature vimāna of fourteen talas and round sikhura on a pilaster and projection with a pilaster.

Entrances:-The jambs of the entrance on each side have at the base a wide section with a big pūrṇakalasa with creeper emerging out of it. One vertical has an elephant at the base and a row of lions above. Two verticals are decorated with the creeper design and the third with lotus leaves. The upper beam has five projecting sections. The lintel contains the figure of Gajalakṣmī. The paḍi or bottom piece has a projection in the centre. Before it is a moon stone with lotus leaves and buds at the corners.

Interior: On the inner side of each section of the wall on either side of the entrance, there are three pilasters in the wall.

Inside is a double square with twelve plain pillars on the edges of the outer square and four in the corners of the inner square. Inside the inner square is a low circular elevation.

Roof:-The greater part of the roof has now diappeared and only that part which is above the walls remains. It projects two feet beyond the walls and its underside is cut into squares by narrow vertical and horizontal rafters.

II. THE TEMPLES OF WARANGAL FORT

Warangal, a flourishing town and an important educational centre, is the headquarters of a district of that name in the Telingāna part of Āndhra Pradēsh. This town, variously known as Ōrugallu, Ēkaśilānagara, Ēkōpalā and Āndhranagarī, was the celebrated capital of the illustrious Kākatīya dynasty, which ruled over Āndhradēśa between 1000 and 1323 A.D. It was a great centre of literary and cultural activity during the 12th and 13th centuries and the first quarter of the 14th century. The town can be reached through a Railway station of that name on the Vijayavāḍa-Kāzīpēţ section of the Central Railway. It is about six miles distant from Hanumakoṇḍa, the earlier capital of the Kākatīyas.

There is an extensive fort, a stahaladurga, opposite the Warangal Railway station, most of which is still in tact. This fort contained the royal palace and the residential quarters of various classes of people. The city extended to a considerable distance outside the fort and could be seen from the hills of Hanumakonda.

Interesting information is available in the Local Records and the traditional sources about the rise of the town into prominence. It seems that one day a bullock cart conveying goods to Hanumakonda struck a rock and turned up side down. Its axis. which was of iron, came into contact with the rock and was turned immediately into gold. The contemporary Kākatīya monarch. Prola II. came to the spot of the accident and found a linga shooting up out of the rock. He built a temple enclosing the linga which subsequently came to be known Sparsavēdī Svavambhū. Rudradeva, the son and successor of Prola, is said to have built the town of Orugallu and transacted part of his business from that centre. Ganapatideva, the nephew of Rudradeva and the greatest of the Kākatīyas, is stated in an inscription dated in S. 1174 as ruling from Hanumakonda but a record of S. 1176 describes him as ruling from the city of Orugallu. Obviously, the monarch shifted the capital permanently from Hanumakonda to Warangal some time between 1252-1254 A.D. His two successors, Rudrāmbā and Prataparudradēva, continued to rule from the city.

A Telugu literary work, named the Krīdābhirāmamu, gives an interesting description of the city as it was in the early fourteenth

century. It describes the sojourn of two friends, a brahman and a vaisya, from sun rise to sun set in the city. The friends first entered the Velipālemu and then moved on to Mēdarivāda and saw a mēdari woman and a woman of the untouchable caste. They next went to the Mailasanta and the Hālikavāti in the middle of the Velipālemu. Here, they saw several people belonging to the lower classes and a group of gamblers. Then they went to the Moharivada and proceeding north came across the deep moat. Next, they passed thorugh the entrance in the stone wall. Avoiding the main highway which was crowded with traffic, they took a side road and walked on. They saw the Virulagudi or the temple of the Heroes, the shrine of Ekavira and the temples of Mailaru, Bhairava, Camadesvari, Vîrabhadra. Musanamma, Kumārasvāmi and the Pāndavas. From here could be seen the temples of Kēśava and Svayambhū glittering in the sunlight. They reached a Bhairava temple by noon and heard sixteen strokes struck in the royal palace. They ate in a hotel in the Brāhmaņavāda and rested for a while. Next, they entered the Vēsyavātikā or the quarters of the dancing girls and met Mācaldevī, the famous courtesan of the court of king Kākatiya Pratāparudradēva. After visiting the houses of some public women, they witnessed snake play ram fighting and cock fighting. Ultimately, they reached the houses of their ladies love.

It is possible to identify some of the places mentioned in the Krīdābhirāmamu and locate them in the modern fortress of Warangal. The fort consists of a wide mud wall, known as the Maṭṭi-kōṭa, with an opening in each of the four cardinal directions. There is a well fortified entrance in the west and a winding path through it leading into the interior. About two furlongs away is another enclosing wall buit of huge blocks of stone, known as the Rāṭi-kōṭa. There is a stepped gallery on the inner side of this wall (Pl. VIII-1). The stone wall too has four entrances and a ziz zag pathway going through each of them. To the south-west of the path are two small shrines known as the Erlal gudi or Vīrula gudi and the Mēḍrāyan gudī. To the north of the path way are the shrines of Vīrabhadra and another small shrine. Further down the road is a wide enclosure, also to the

^{14.} I saw these two shrines in 1933. A number of houses have been built in this locality subsequently and these shriness are not to be seen now.

north on the edges of which the foundations of a brick wall can be This brick enclosure contained another, known as the Kancu-kōta and inside the latter was situated the royal palace. Further down, the road takes a short bend to the south. west of this bend is a later structure known as the Kushimahal and to its east is a wide area marked by four finely carved torana. one in each cardinal direction. The area was partly excavated a few years ago and the remains of a beautiful temple were brought to light. Some of the doorways and sculptured pieces recovered during the course of the excavation, are still lying about scattered in the excavated area. Part of this site in the south-eastern area has been recently excavated and two shrines and a mantaba have been brought to light. After the bend, the road runs due east. To the left of the road are the shrines of Rama, Visnu and and Venkates'a. To the south of the old exacavated area is the Svayambū temple and to its east a big rock, known as the Ekasila or Orukallu, which gave its name to the city. In the southern part of the fort and near the southern gateway in the stone wall are two shrines, one named the Nelasambhugudi and the other a small Devi shrine. To the south of the Svayambū temple is another big shrine known as the Jangamesvara temple.

The Erlal gudi mentioned above is identical with the Vīrula gudi mentioned in the Krīdābhirāmamu. Taking this as the basis we can identify the various divisions and temples mentioned in that literary work. It is certain that the two friends entered the the fort through the western gateway in the mud wall. between this wall and the stone wall inside it was known as the Bāhyakatakamu or the outer fort and contained the Mailasanta, or the place were the fair was held, the Hālikavāti or the quarters of the agriculturists. In this area were also included Moharivade and Velipalemu. Inside the second enclosure or the Rāti-kōta was the temple of the Heroes identical with the Erlal The shrines of Ekavīra, Camadēs'vari gudi mentioned above. and other deities must have been in the neighbourhood of the Vīrulagudi. The temples of Kēśava and Svayambhū must be identical with the Svayambhū temple and one of the two Visnu temples found to the left of the road running across the stone fort. In the southern part round about the Nēlas'ambhu gudi, mentioned above, must have been located the Brahmanavada and the Vēsyavātikā.

The Local Records and the traditional accounts describe in vivid detail the number of inhabitants and their occupations. The city was in the full swing of its glory during the reign of Kākatīya Prataparudradeva and was the home of poets, artists and all other men of talent. The city withstood several invasions. Yādavas of Dēvagiri invaded it several times but were repelled. The Muslim forces of the Sultans of Jelhi attacked and besieged the fort on several occasions during the regin of Prataparudradeva. The first of these was sent by Sultan Allauddin Khalji in 1308 A.D. but the Kākatīya generals met the invaders at Upparapalli, defeated and drove them away.(15) The Sultan sent a second expedition under the command of his famous general, Malik Kaffur. general successfully besieged the fort and the Kakatiya monarach made peace with him. The third invasion of the city took place in 1318 A.D. during the reign of Sultan Mubarak. The next invasion, which came in 1321 A.D., was more serious and was led by Prince Ulugh Khān, son of Sultan Ghiasuddin Tughlak. invasion was undertaken with the express purpose of annexing territory by defeating the Hindu rulers of the Deccan. The Kakatiya forces offered stiff resistence and the Muslim prince was defeated and forced to fly to Devagiri with much loss of men and material He led a surprise attack in 1323 A.D. The greater part of the Kākatīya army was away in the south and the forces that were at the capital were not enough to repel the invader. In the final engagement Prataparudradeva was captured and sent a prisoner to Delhi. He died on the way on the bank of the Narmadã.(16)

The fort and the city of Warangal had a chequered career subsequent to the fall of the Kākatīya empire after the capture of Pratāparudradēva. The city was named Sultānpūr and left in charge of a governor. Ulugh khān marched further south, captured the area between Nellore in the east and Quilon in the west and returned home via Orissa(17.) The subordinates whom the prince left behind in order to govern the conquered territories oppressed the people in all possible ways. Very soon, the nāyakas and the generals of Pratāparudradēva who survived the catastrophy of 1323 A.D., rallied together and inspired the people to rebel against their Muslim oppressors.

^{17.} Ibid p. 89.

There were risings all over and everywhere the Muslims were driven out and Hindu independence was re-established. One of the leaders in this peoples' war was a certain Musunuri Prolaya Nāyaka who liberated part of coastal Andhra and the agency tract and ruled over it form Rekapalli. His cousin, Kāpaya Nāyaka, fomented a rebellion in Telingana, drove away the Muslim governor of Warangal and captured the city. He annexed a wide area stretching up to Bidar and Kaulas and constituted it into an independent Hindu kingdom and ruled over it form Warangal. This new kingdom had to encounter opposition from the Sultans of the newly established Bahamani kingdom in the west and the chiefs of the Velama kingdom in the Nalgonda district in the south. Kāpaya Nāyaka was killed in a battle with the Velamas in 1368 A.D. and the Hindu kingdom of Warangal came to an end and the city and its neighbourhood were annexed to the Velama kingdom. Shortly after this, the Bahmani Sultan, Ahmad Shah conquered Warangal and incorporated it in his kingdom. Later the Gajapatis of Orissa invaded and conquered the city. Subsequently, a Hindu chieftain, named Sītāpati or Chitāb Khān, took possession of the city and it enjoyed a short spell of glory under him. Ultimately, in the first quarter of the sixteenth century it came to be included in the Qutb Shahi kingdom founded by Sultan Quli.

The following information is derived from inscriptions about Warangal:—

- 1. Dated in S. 1105 in the reign of Kākatīya Rudradēva, registers the king's gift of the village of Modapalli and narrates his exploits.(18)
- 2. Dated in the reign of king Mahādēva of the Kākatīya family, states that the king learnt *dharma* from his preceptor, Dhruvēśvara and was engrossed in the worship of Śiva.(19).
- 3. Dated in the year Sarvadhārin in the reign of Kākatīya Gaņapatidēva, enumerates the rates of taxes on articles of merchandise fixed by the Śvadēśi and Paradēśi merchants. (10)
- 4. Dated in the reign of Kākatīya Gaņapatīdeva, states that the Dharmasālis of three towns installed Sālēs'varadēva at

^{18.} CTI Wg. 20.

^{19.} Hyderabad Archaeological Series no. 13, pt. 2, Ins no. 15

^{20.} Ibid no. 14

Gaṇapatīśvaram in the name of the king and Sakalēśvara in the name of all devotees and gifted to these gods ayavetti and that the Nakaram of Ciramitti gifted a vrtti to god Nakarēśvaradēva.(21)

- 5. Dated during the same reign, registers the gift of taxes on articles of merchandise by the *Nakaramu* trading in five metals to god Sōmanāthadēva of Mattiyavāḍa.(21a)
- 6. Dated in the reign of Kākatīya Pratāparudradēva, mentions Aghōraśivācārya, the sthānapati of god Sahasaralinga-Gaṇapatīśvaradēva in the Māmṭu-Annaya guḍi, the temple of Vīrabhadrēs'vara, Samtagaurīśvara, Nagarapuvāḍa Rudrēśvara, Brāhmalakuṇṭa Sōmanāthadēva, the god of Upparavāḍa and the maṭha of Rācagurudēva. Mentions also the Pānugaṇṭivāḍa.(22).
- 7. Dated in Kali 4561, states that Vīrabhadra Raghudēva Narēndra conquered the fort of Orugallu situated in the kingdom of Omainusāhu, the Sultān of Kalubarga. This Raghudēva was the son of Parašurāma, brother of Pratāpa Kapilēśvaja Gajapati, who became the Lord of Utkala at the command of Puruṣōttama, and who was the grandson of Jāgēs'vara. (E. 1. XXXI., pp. 125-130).
- 8. Dated in the year Pramādi in the reign of the Gajapati king, Kapilēndra, states that Lacchidēva Kumāra Mahāpātra, son of the king, captured the fortress of Orugallu.(23)
 - 9. Dated in the same year and the same reign, states that Hambīra Mahādeva Kumāra pātra, son of the king, captured Gaņdikōṭa.(21)
 - 10. Dated in S. 1425, states that Cittāpakhāna, who belonged to the Bhōgi family and who was the son of Mādayanāyaka and and grandson of Nāga, captured the city of Warangal, re-installed Pāñcālarāya Kṛṣna and the goddess Kākatī, removed by the Turuṣkas and that he worshipped Svayambhudēva, the tutelary deity of the Kākatīyas, daily. Warangal Fort.

(to face p. 33)

The following temples and other objects of antiquarian interest are found inside the $R\bar{a}ti-k\bar{o}ta$ or stone enclosure:—

1. Vīrabhadra temple:—(Pl. VIII-2) This small temple is situated to the left of the road running between the western and eastern entrances in the stone wall. It is very near the steps on the inner side of the wall in the north-west corner. It is a single shrine with two porches and faces the north. There is a low platform to the west where probably there was another porch.

The adhistāna of the temple is buried in the ground. There is a low $v\bar{e}d\bar{\imath}$ or parapet on its edges. There are four pillars in the east and west on this $v\bar{e}d\bar{\imath}$ and two on the portions forming the porches. The walls of the Garbhagrha and Antarāla are plain. The vimāna is a stepped pyramid built of brick and each of its faces has a central conical band. The sikhara is of the Nāgara Order.

There are four central pillars in the mantapa before the Antarāla with a square elevation between them. The underside of the ceiling above these pillars contains a satkōṇa inside a square and big lotus petals in the corners. The Antarāla has an open entrance set between two pillars and there is no dvāra. There is a finely carved moon stone before the padi of the dvāra of the Garbhagṛha. This dvāra is between two pillars and there is a canopy in three projecting sections above its upper beam. The architrave above contains a row of five miniature vimānas, each ot them in three sections, one projecting from the other. The Garbhagṛha is empty.

- 2. Maṇḍalamma guḍi:—This is a small structure situated to the north of the Vīrabhadra guḍi. This shrine, built entirely of stone, contains only the Garbhagṛha and Antarāļa. The entrance of the Antarāļa is between two pillars and its dvāra has a canopy above the upper beam projecting in three sections. The architrave above contains a row of five minitature vimānas. The jambs on either side of the dvāra have, at their bases, the figures of Śaiva dvārapālakas and perforated screens above. The vimāna above the Garbhagṛha is a stepped pyramid with a row of semicircular elevations on each step and is crowned by a Nagara sikhara with a gable on each face.
- 3. Brick wall:—Further down the road and also to its left are the foundations of a brick wall which runs parallel to the road

and goes into the interior. According to local tradition, there was another enclosure of bronze walls inside this brick enclosure and the royal palace was located inside the interior.

- 4. Old excavated site (pl. IX-I) -A little further down. the road takes a bend to the south following the western edge of a wide area excavated some years ago. This area is marked by four finely sculptured toranas, one in each of the cardinal directions. Each torana consists of four pillars, two on each side, elegantly carved and a cross beam with a row of lotus buds hanging from its underside. There is a well carved bracket connecting the outer pillar and the upper beam. There is a swan, very well sculptured, at each end of this beam. Above this beam is another, richly carved. (Pl. IX-2-X-I). The area between these toranas contained originally a majestic temple built of granite stone. It must have been the grandest structure of the Kākatīya period when in tact. Several broken pieces of sclupture like door jambs, pillar capitals, various parts of pillars, sculptured friezes and slabs containing fine dance sculptures are scattered about in the excavated area. (Pl. IX-2.XI, XII and XIII-1).
- 5. Newly excavated area:—This area is situated in the south-western corner of the site situated between the four tōraṇas. Excavations recently conducted in the area have brought to light (1) a small quardrangle with an entrance in the north and an adhiṣṭāna on the three sides with a short flight of steps in the west and south. On the adhiṣṭāna are the foundations of small shrines, with a moon stone before each, a raised square in the centre and an outlet for water at the back. (2) an open pillared maṇṭapa and (3) a high adhiṣṭāna which must have had a big shrine on it. These structures must have formed adjuncts to the main temple which must have existed in this area.
- 6. Rāma temple:—This small shrine is to the left of the road which here takes a straight course to the east and abuts on the newly excavated area. It consists of the Garbhagṛha, Antarāļa, manṭapa and a porch and faces the east. The adhiṣṭāna is buried and there is a low $v\bar{e}d\bar{i}$ on its edges on the three sides of the open manṭapa. There are four plain pillars on the sides and four in the porch on this $v\bar{e}d\bar{i}$. There are two huge $dv\bar{a}rap\bar{a}lika$ figures on either side of the porch. There are four plain pillars in the centre of the manṭapa with a lotus on the under side of the ceiling above them. The entrance of the

Antarāla is between pillars. The jambs contain sculptured figures at the base and fret work frames above. The verticals of the dvāra are adorned with diamond design and the padi has a projection in the centre. The lintel is empty and there is a canopy projecting in three sections above the upper beam. The architrave above contains a row of five miniature vimānas, the two at the extremities being a little broader and of six talas and the two adjacent to them being narrower and containing five talas and the central vimāna being in three sections one emerging out of the other and containing six talas and three round sikharas. The Antarāla is narrow and plain. The dvāra of the Garbhagṛha is between two pillars and there is a plank shelf on each of its walls.

There are a few sculptured slabs in the compound of this shrine. Three of them contain fine figures of Siva seated in padmāsana with pairs of cāmaravāhinis on either side. One slab contains the figure of Gaṇapati. Another contains the figures of female deities each seated with the left leg folded and the right hanging holding a sword in the left hand and keeping the right palm on the right thigh. One more slab contains the figure of two soliders before a shrine.

7. Vişnu temple:—This temple is further down to the left of the road and is similar in plan and construction to the temple described above. It has the Garbhagṛha, Antarāla, manṭapa and a porch. There is a low $v\bar{v}d\bar{\imath}$ on the edges of the adhiṣṭāna, now buried and four pillars on the sides and one on either side of the porch on the $v\bar{v}d\bar{\imath}$. The outer side of the walls of the Garbhagṛha and Antarāla are decorated with (a) three plain pilasters (b) a miniature shrine with double pillars, flat cornice, vimāna in three projecting sections having thirteen talas, phalaka in sections, a round sikhara and kalasa and linga inside (c) three plain pilasters and (d) a miniature shrine as in (b). The vimāna of the temple, contains fourteen steps and is crowned by a Nāgara sikharā.

There are four plain pillars in the centre of the mantapa with a raised square between them. The entrance of the Antarāla is between two pillars and the jambs contain fret work frames. The padi of the dvāra is in three projecting sections. The upper beam is also in three projecting sections and has a row of lotus buds on the under side. The dvāra of the Garbhagrha is simple.

8. Venkațesa gudi:—This temple is situated further down to the left of the road. It contains the Garbhagṛha, Antarāla, manṭapa and porch. As in the other shrines described above, the adhiṣṭāna is buried and there a is a low $v\bar{v}d\bar{i}$ on its edges. There are three pillars on each side and four on either side of the porch, on this $v\bar{e}d\bar{i}$. There is a pillar on either side of the Antarāla. Each wall of the Garbhagṛha is decorated with a $vim\bar{a}na-k\bar{o}sṛa$ flanked by three pilasters on either side. There is a flat $kap\bar{o}ta$ above the walls. The $vim\bar{a}na$ of the temple is crowned by a $N\bar{a}gara sikhara$.

There are four plain pillars in the centre of the mantapa. The entrance of the Antarāla is between two pillars. The jambs contain fine figures of dvārapālakas and several sculptures above e.g. ten women standing in a row in various dance poses, pearl hangings and a group of ten women with one playing the mrdanga and others dancing. The upper beam has thirteen semi-circular elevations. The architrave contains a row of seven miniature vimānas, all with round sikharas and kalasas. The entrance of the Garbhagrha is also decorated. The base of the jambs contains two cāmaravāhinis and three blocks above with a row of lions. The verticals of the dvāra are also decorated with rows of lions. The upper beam of the dvāra has eleven semi-circular elevations.

9. The Svayambhū temple (Pl. XIII-2)—This temple is to the right of the road and opposite the old excavated site. This is said to be the shrine of god Svayambhū, one of the tutelary deities of the Kākatīyas. It is a simple structure with the Garbhagṛha, Antarāla, Manṭapa and three porches. Each porch has two pillars in the front and a projecting roof. The dvāra inside the porch has a canopy projecting above its upper beam. The outer side of the walls of the Garbhagṛha and Antarāla is plain. The vimāna is a narrow stepped pyramid of twenty one steps with a central conical band on each face. It is crowned by a vṛtta sikhara now shaped into an āmalaka.

The adhistāna of the temple is buried. There is a low $v\bar{v}d\bar{i}$ on its edges with pillars on the sides, one on either side of the Antarāla and two in the porch on this $v\bar{v}d\bar{i}$. There are four pillars in the centre of the mantapa with a raised square between them. There is a fine granite nandi facing the Antarāla. The entrance of the Antarāla is between two pillars, The jambs have $dv\bar{a}rap\bar{a}lakas$ at the bases and perforated screens above. A canopy in three sections projects over the upper beam of the $dv\bar{a}r\bar{a}$ and a

row of lotus buds hangs on its underside. The Garbhagrha has a plain entrance and contains a small linga inside.

A few loose icons are to be found inside the mantapa of this temple. One of them is an image of Vīrabhadra, located in the southern porch which is closed up with three walls. This deity is ten handed and holds $b\bar{a}na$, $gad\bar{a}$, dagger and another object in the upper right hands and dhanus, $n\bar{a}ga$, $gad\bar{a}$ and another object in the upper left hands. The lower right hand holds $tris\bar{u}la$ and the lower left parasu. The god has two tusks and is decorated with $kir\bar{t}ta$, two $graiv\bar{v}yakas$, $h\bar{a}ra$, $yaj\bar{n}\bar{o}pav\bar{t}ta$, broad girdle and a long garland reaching below the knees. There are two images of Mahiṣamardanī, a miniature shrine with a linga inside, two icons of Gaṇapati, a smaller Vīrabhadra image and a slab containing twenty five lingas in this mantapa.

There are a few interesting objects in the compound of this temple like a Caturmukhalinga with four faces, a loose head, probably of a royal figure, nandi on a platform, Gaṇapati image and a slab with the figure of Bhikṣāṭanamurti built into the wall

- 10. Ekasilā (Pl. XIV-1 & 2)—Almost in the centre of the stone fort is a huge rock from which the city and the fort seem to have derived the name Ekasilānagara or Orugallu. It contains on its top a small shrine with an open pillared mantapa before it.
- 11. Nēlasambhu gudi—This small shrine is situated in a depression in the southern part of the fort near the southern gateway. It is partly buried in the ground. It consists of the Garbhagṛha, Antarāla, manṭapa and a porch facing the east. The walls of the Garbhagṛha and antarāla are plain. The roof is flat and there is no vimāna above the sanctum. There is a row of semi-circular elevations on the edges of the roof.

There are four pillars on either side on the $v\bar{v}d\bar{t}$ whose top alone is visible and four more in the porch. There are two pillars on either side of the $Antar\bar{a}la$ and four in the centre of the mantapa.

There are two fine sculptured pieces outside the shrine to the right, one containing the Saptamātṛkas and the other a fine figure of Siva dancing in the bhujangatrāsa pose with nandi to right.

12. $D\bar{e}v\bar{i}$ shrine (P1 XV-1)—This small shrine is to the northwest of the shrine described above. It consists of the Garbhagrha

and $Aintar\bar{a}la$ with an entrance between two pillars. Each jamb contains at the base the figure of a $dv\bar{a}rap\bar{a}lik\bar{a}$ with a cauri in one hand. The jambs of the $Garbhag_rha$ contain at the base a female figure seated in $padm\bar{a}sana$ holding in each of the two hands the end of an object held above the head in the shape of a semi-circle. The roof is flat and there is no $vim\bar{a}na$ above the $Garbhag_rha$.

13. Jangamēsvara temple (Pl. XV-2)—This temple is to the south-west of the Svayambhū temple. It consists of the Garbha-gṛha, Antarāļa, maṇṭapa and a porch, facing the north. The adhiṣṭāna of the temple is buried. The vēdī on its edges contains a row of four petalled lotuses on both the inner and outer sides. The walls of the Garbhagṛha and Antarāļa are plain and built of huge blocks of stone. The vimāna is a stepped pyramid and built of brick. It is crowned by a Nāgara sikhara.

There are five pillars on each side and two at the beginning of the porch on the $v\bar{e}d\bar{\imath}$. There are six pillars in the centre of the mantapa forming two compartments each containing a raised square inside it and a circular part on each square. The entrance of the Antarāla is between two pillars with the roll and leaf capitals. The jambs contain a perforated screen hidden by a tall slab covered by lotus scroll work all over. The upper beam of the $dv\bar{a}ra$ has a projecting canopy in three sections. The architrave above contains a row of five miniature shrines each with a standing deity inside and a $N\bar{a}gara$ sikhara above. The Garbhagṛha is empty. Its $dv\bar{a}ra$ is plain and there is a big slab in the place of the lintel containing the figure of Gajalaksmī.

14. Kushimahal—This is a later construction situated to the right of the road above its bend near the old excavated area. A number of loose sculptures are thrown about round this building. The most interesting of these is the head, probably of a royal personage.

TEMPLES OF KAŢACHPŪR

Kaṭachpur or Kaṭākṣapura, is a small village situated about a mile in the interior to the left of the Warangal-Mulugu road in the Warangal district of the Telingāna part of Āndhra Pradēsh. It is on the way from Warangal to Pālampēṭa. There are two triple shrines outside the village very near the road. (26)

One of the shrines faces the east and the other faces the south. Both are alike in size, plan and method of construction. Both are in a ruined condition. Both of them are 54 feet square.

The first shrine, which faces the east, consists of a central mantapa with a porch in the east and shrines on the north, west and south. It has a high $Upap\overline{\imath}$ that and $adhi\underline{\imath}$ tana on whose edges there is a low $v\overline{\imath}d\overline{\imath}$ connecting the porch in the front and the Antarala behind. In the centre of this $v\overline{\imath}d\overline{\imath}$ on both the inner and outer sides there is a wide band decorated with a row of four petalled lotuses. The walls of the Garbhagṛha and Antarala are plain and built of large blocks of stone. The roof projects about two feet forward from the top of the walls and its edges contain a row of semi-circular elevations above. The underside of this projection is cut into small squares. The roof is flat and there are no vimānas on the three shrines.

On the $v\bar{v}d\bar{t}$ above the adhistana are four pillars, one in each angle and two on either side of the porch. There are four pillars in the centre of the mantapa and the under side of the ceiling above them contains the satkona in a square. The entrance of the Antarāla of each of the shrines is well carved. It is situated between two pillars. The jambs have at the base the figures of $c\bar{a}$ maravāhinis and the lintel has the figure of Gajalakṣmī. There is a canopy above the upper beam of the $dv\bar{a}$ in projecting sections with a row of lotus buds hanging on its underside. The architrave above is decorated with a row of five miniature shrines. Two of the shrines contain lingas in the Garbhagrhas.

The second triple shrine is similar. There is a $v\bar{v}d\bar{t}$ in the Garbhagrha of the shrine in the north and a fine image of Vişnu standing in the Garbhagrha of the shrine to the east.

^{26.} These temples have been briefly noticed in the Annual Report of the Hyderabad Archaeological Department for 1935-36, pp. 8-9. They are wrongly identified as Cālukyan temples.

TEMPLE OF JĀKĀRAM

This is a fine though small temple situated further down the Warangal-Mulugu road, outside the village of Jākāram. It is about a furlong from the road to the left.

The temple stands on a low mound in midst of fields and faces the south. It is a single shrine with Garbhagrha, Antarāla and mantapa with three porches in the north, west and south. The Upapītha is buried and part of the adhiṣṭāna is visible. The walls of the Garbhagrha and Antarāla are plain and built of large blocks of stone. There is a low vēdī on the edges of the adhiṣṭāna with pillars supporting the roof above. The space between the porches is walled up. The outerside of these walls is decorated with three vimānastambhas and three pilasters alternating in all the sections. The roof is flat and there is no vimāna above the sanctum.

There are four pillars in the centre of the mantapa with a square between them containing a circular elevation on it. The under side of the ceiling above these pillars contains a satkona in a square. The Antarāla has a well carved entrance set between two pillars. The base of the jambs is adorned with the figure of a woman standing in a graceful pose holding bow and arrow and attended by two other women. The upper beam of the dvāra has a canopy in three projecting sections above it. The architrave above contains a row of five miniature vimānas. The entrance of the Garbhagṛha is similar. Inside the Garbhagṛha is a low $v\bar{e}d\bar{\imath}$ with a carved kavaca but the image is missing.

THE TRIPURĀNTAKĒŠVARA TEMPLE,

TRIPURĀNTAKAM

Tripurāntakam is a small village in the Mārkāpur Taluk of the Kurnool district in Āndhra Pradēsh. It is situated near the Mārkāpur Road Railway Station on the Bezwada - Guntakal section of the Southern Railway. There is a hillock, named Kumārādri, about a mile to the west of the village. On this hill is the famous temple of Tripurāntakēśvara, a celebrated centre of pilgrimage for the Śaivas.*

Traditions

Tripurāntakam is intimately associated with S'rīs'ailam, the famous centre of S'aiva pilgrimage and great stronghold of Vīraśaiva, situated on the Nallamalais in the Nandikōṭkur Taluk of the Kurnool district of Āndhra Pradēsh. S'rīs'ailam is described as an extensive kṣētra, covering an area of 20 yōj.mas, every inch of which was holy. This area had four well known Dvāras or entrances, Tripurāntakam in the east, Jōti-Siddhavaṭam in the south, Umāmaēśvaram in the north and Brahmēśvaram (Alampūr) in the west. Thousands of pilgrims that visited S'rīśailam, also visited these four gateways. There was an act of great piety, known as giri-pradakṣiṇa or circūm-ambulation of the hill of S'rīśailam and this included a visit to the four gateways. Each of these four places is said to contain numerous tīrthas and lingas of S'iva.

Accounts of the sanctity of this place and its deities and tirthas are found in the Mallikārjunapanditārādhyacaritramu, a Telugu literary work, and in the Śrisailakhanda of the Skāndapurāṇa. The Śrīsailakhanda mentions the Gandharvatīrtha, Kuṇdiprabhā, Pāpavināśana and Mōkṣaguṇda as some of the holy tīrthas round Tripurāntakam. Among the deities of this place,

 $^{^{34}}$ I surveyed this temple once in November, 1929 and again in Apri, 1958.

mention is made of Dhūrjatiśvara, Rāmēśvara, Vrddhaśailēśvara, Uttarēs'vara, Kēdārēsvara, Gaurīsvara, Saptakotīsvara, Mandukēśvara, Sahasralingēśvara, Paraśurāmēs'vara, Bhramarēśvara, Manikarnikēsvara, Muktīsvara, Talasiddhēsvara, Srīkāmēsvara, Dharmēśvara, Punnēśvara, Tripurāntakēśvara and Tripurādevī. An inscription dated in S. 1175 mentions that the lingas of Papavināśa, Amgarēśvara, Mulasthānēs'vara, Somēs'vara, Khadgēśvara, Kanyā-siddhēśvara, Kēdārēśvara, Mallikārjuna, Kapilēs'vara, Gaurīśvara and Uttarēśvara, all of them svayambhū lingas, surrounded the Kumārādri hill, the abode of Tripurāntakēs'vara. (3.I.I.X.—340). The Mallikārjunapanditārādhyacaritramu mentions twelve lingas of Siva-Tripurāntakēsvara, Gauresvara, Somēsvara, Kēdārēśvara, Khadgēsvara, Papavināsana, Kapilēsvara, Uttarēsvara etc., as situated round Tripurantakam. It is said that once two untouchables, who made their living by killing animals, went round the Kumaradri and on account of the merit that accrued to them for this act, were reborn as the sons of king Ballaha, Being aware of the sin committed by them in their previous birth and repenting sincerely for it, they obtained salvation and entered Siva. On another occasion, a hare and a mouse also obtained salvation at Tripurāntakam, having done a small meritorious deed.

Inscriptions*

There are 115 inscriptions in the temple of Tripurāntakēśvara and its neighbourhood. Most of these contain gifts of lamps and a few register gifts of lands, villages and taxes. These records indicate that the temple received wide patronage during the period of the rule of the Kākatīyas of Warangal. One of them states that the Central shrine was built of stone in S. 1177 (1255 A.D.) by Śāntaśambhu, the son of Viśvēśvaraśivācārya, under the orders of the Kākatīya king, Gaṇapatidēva (169 of 1905). Another states that Tripurāntakam marked the eastern entrance to Srīśailam, that it was guarded by Bhairava and that it was surrounded by eleven svayambhū-lingas (S.I.I. X-340). Mēlāmbikā, a sister of Kākatīya Gaṇapatidēva, built a shrine and installed in it god Mēlāmbikāśvara, (Ibid 254). A teacher,

^{*}This information is based upon the texts of the Tripurantakam inscriptions published in S.I.I. X. (Vide Nos. under Tripurantakam on p. 6 of the contents).

named Dharmasiva, of the Golagi school, built a Bhandaruvumatha for the temple (Ibid. 315). Many promintent feudatory rulers, generals and officials of the Kākatīya period made valuable gifts to gcd Tripurāntakēśvara. Among the Telugu Coda chieftains of the time, Karikāla Coda gifted a tank in the Mārjavādi in S. 1025 (Ibid. 62), Another, named Siddhayadeva, gifted two villages in the Pūngi-nādu in S. 1179 (Ibid. 355). A Telugu Paliava chief, named Allāda Pemmayadēva, gifted a lamp in S. 1181 (Ibid. 362). The Velnadu chief, Gonka, gifted a village in the Kammanādu in S. 1028 (Ibid. 63). Among the Cagi chiefs. Ganapaya gifted a lamp in S. 1165 (Ibid. 356). Oueen Muppamadēvī of the same family also gifted a lamp in S. 1164 (Ibid. 296). Mummadi Potaraja of the Kota family and Murarı Ganapati of the Kondapadamati family also gifted cows for setting up lamps in the temple (Ibid. 308, 329). The feudatory rulers of Natavadi also figure in the inscriptions of Tripurantakam. Mahādēva, Mummadı Ganapa and Rudradēva of this family. gifted lamps in S. 1170 (Ibid. 322-367). The Kayastha chiefs, who were the governors of the Tripurantakam area, also patronised the Tripurantakes'vara temple, Gandapendāra Gangavasāhini gifted one village in the Dupali-Kampanam in S. 1172 (Ibid. 332). and another in the Mottavādi in S. 1179 (Ibid. 346). His minister, Namadeva pandita, gifted another village in S. 1176. (Ibid. 343). Gandapendāra Jannigadēva, another Kāyastha chief, gifted two viltages in the Pallinadu in S. 1181 (Ibid. 370). Among officials, a Pañcakaranādhipāti gifted a lamp in S. 1130 (1bid. 246). subordinate of the Haihaya king, Anungudeva, is said to have tamed and ridden a turbulent horse, named Punyamurti and gifted a lamp to the god, in honour of his achievement in S. 115%. (Ibid. 283). Another official gifted in S. 1159 a lamp on the occasion of the Kārtika-parva festival. (Ibid. 287).

There are several instances of taxes and tolls being gifted to the temple. A sarvādhikāri of Kākatīya Gaṇapatṣ-dēva remitted to the god the sunkamu collected on 30.) bullock loads of articles obtained from the hill (Ibid. 304). One official gifted the Veṭṭi-sunkamu collected on salt sold at Tripurāntakam (Ibid. 328). A merchant gild, known as the Nanādēsi-Nagaram-Samgham, gifted Māgama on every māçī worth of goods sold (Ibid. 429). Another gild, the Nānādēsi-Pekkanḍru, gifted taxes on articles sold in several places (Ibid.

473). Another Ubhaya-Nānādēśi-Pekkandru, gifted uppu-sunkamu, āyumu and mādabadi-sunkamu to the goddess, Tripurādēvī (Ibid. There are references in the inscriptions to the staff of the temple and its adjuncts like cooks, servants, watchmen, reciters of the Mantrapuspa, priests and other employees of 72 niyōgas (Ibid. 388, 432 and 502). Mention is also made of several festivals conducted in the temple like the waking up of the god at dawn, Tripuradahana-utsavam, Pavitr-ārōhana Gānti-utsayam. Vivāha-mahotsavam (Ibid. 340, 466 and 479). Arrangements were also made by devotees for making food offerings to the god on several occasions like Vēgō-jāmu-padi, Viśvēsvarāsandhya, Madhyāhna-sandhya, and Pratas-sandhya (Ibid. 340, 371 and 464). Some devotees gifted valuable jewels and utensits like Pattas, Gangāvatāra, flowers of gold, flag staffs of gold and Caturmukha-Kōhali of gold (Ibid. 431, 474 and 550). The famous S'aiva teacher, and Raja-guru. Visvesvara Saivācārya, got a forest cleared, founded a village, named Visves/varapuram and gifted it to the god (Ibid. 340). Ambadēva, the tamous Kāyastha chief who was a Kākatīya subordinate, remitted, at the instance of the teacher, Dharma Siva, Känika and other taxes collected from the villages of the temple for the purpose of supplying perfumes and fine cloths for the use of the god, for employing musicians and dancers and for conducting a choultry for feeding the brahmanas, ascetics, Vīra-vratas, Māhesvaras. Pāsupatas, Kālāmukhās, Bhairavas and Tamalas that visited Tripurantakam. (Ibid. 657).

Description of the temple.

The temple of Tripurāntakēsvara is situated on a hillock, named Kumāragiri and faces the east. It is inside a prākāra which has four gōpura entrances. The entrance in the south is now used as the main entrance and has a flight of steps leading to it. The adhiṣṭāna of the east gōpura has three plain mouldings and a gaļa cut into compartments adorned with lotuses and pūrṇakalasas. Above are a paṭṭa, narrow recess and ālingapaṭṭikā. There is a small maṇṭapa adjoining this gōpura entrance with four pillars each containing the pāda or pedestal, a rectangular block, octagonal shaft, paṭṭa, a cylindrical part, phalaka and roll capital. The gōpura in the south is similar but there are a few sculptures on the inner side of its walls e.g. Gaṇapati seated, a cow standing Can Iraśēkara seated on Nardi. Siva standing in dvibhanga hlod.

ing parasu in the upper right hand, mrga in the upper left, sūla in the lower right and Khadga in the lower left and Brahmā with three heads seated on the swan.

Inside the prākāra there is a fine S'iva shrine to the west of the south gopura. It seems to have had a pillared verandah in the east and north which was subsequently closed with walls built between the pillars. The pillars are in the Vijayanagara style and contain figure brackets. The top part of the east wall contains the following sculptures south to north:—rati poses, an elephant, a dwarf seated, two elephants, two dwarfs, an elephant. a bull, five dwarfs, two men with a woman between them standing with her hands in anjali, a dwarf, Hanuman and a row containing a lion, elephant, cow with calf and another lion. The top part of the west wall has the figures of dwarfs, lions and makaras. The north wall contains the following sculptures-Lion with makara below, the trunks of both being intertwined: lion standing on makara; woman standing with the right hand raised above the head in vismaya and the left resting on the inner side of the thigh and lion standing on makara.

The entrance of the shrine has a fine doorway. Its base is adorned, on either side, with figures of dvārapālakas standing cross-legged, holding damaru in the upper right hand and nāga in the upper left and keeping the lower right in abhaya and resting the lower left on gadā. The jambs contain rows of lions, scroll work and figures in fine dance poses. The upper beam is in three projecting sections with a row of lotus buds hanging below. The lintel has the figure of Gajalakṣmī. The architrave above the doorway contains the following sculptures:—

- 1. Candraśekhara seated.
- 2. Viṣṇu seated in vīrāsana holding cakra in the upper right hand and samkha in the upper left and keeping the lower right in abhaya and resting the lower left on the left thigh with the palm open.
- 3. Siva seated with the left leg folded and the right hanging. He holds trisūla in the upper right hand, mṛga in the upper left, keeps the lower right in abhaya and rests the lower left on the left thigh.

- 4. Gaṇapati seated holding $tris\bar{u}la$ in the upper right hand, $p\bar{u}sa$ in the upper left and keeping the lower right in abhaya and holding a $m\bar{o}daka$ in the lower left.
- 5. Visnu standing with Garuda to his right.
- 6. Woman in dance pose with a man playing mrdanga.
- 7. Durgā standing with eight hands.
- 8. Woman in a dance pose with a man playing mṛdanga.
- 9. Națarāja dancing resting one leg on the apasmārapursusa.
- 10. Bhairava standing.

There is a group of three small shrines to the north of the west gopura. Of these, one is a shrine of Vișnu. It consists of a Garbhagṛha and a narrow maṇṭapa of tow pillars before it. The verticals of the entrance of the Garbhagṛha contain the figure of Hanumān at the base. Inside is an image of Viṣṇu seated in vīrāsana, holding sankha in the upper right hand, cakra in the upper left and resting the lower right on the right knee in the varada pose and the lower left on the left knee with the palm open and turned upwards. There is another loose icon in this sanctum of Viṣṇu standing holding sankha, cakra, gadā and padma. The two shrines adjacent to this shrine contain lingas.

In the eastern part of the courtyard are two basements, probably used for temporary pandals, in the north. In the southern part are four slabs, one containing an inscription, the second and the third containing the figure of a woman riding a horse, and the fourth containing a similar figure and that of a warrior.

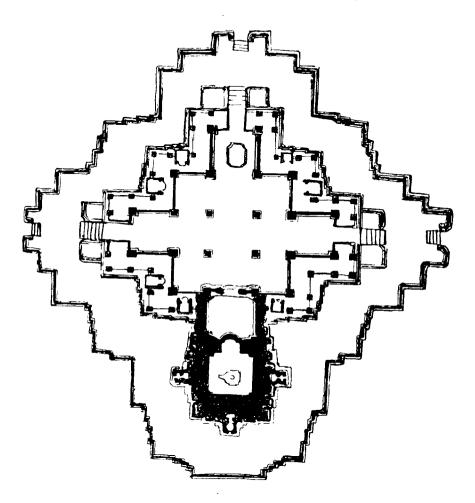

The main shrine of Tripurāntakēśvara stands in the centre of the courtyard and faces the east. There is a dhvajastambha between the east gōpura and the shrine but no entrance into the shrine in this direction. This shrine consists of a closed mantapa, the mukhamantapa beyond it, partly walled and with two entrances in the north and south, two antarālas and the Garbhagrha beyond them.

The main shrine is a simple structure surmounted by an imposing vimāna. The adhistāna is low and contains upāna, recess, patta, recess, moulding, narrow gala and ālingapattikā. The outerside of the walls of the antarālas contain a single kosta or niche each, with two pilasters on either side. The niche in the north wall contains an image of Durgā standing on the head of a buffalo with a man to right and lion to left. The niche in the south wall contains the image of Ganapati in the bhujangatrāsa pose with the right leg resting on the mouse and holding aksamālā in the right hand and danta in the left and keeping the lower right in abhaya and the lower left in Karihasta. Similarly, the three walls of the garbhagrha also contain niches with pilasters. The niche in the south wall contains the image of Candrasekhara standing, that in the west wall contains the figure of Lingodbhavamurti and the niche in the north wall contains the image of Brahmā with three heads. There is a row of $k\bar{u}tas$ and arches containing deity figures on the edges of the roof, which seems to be a later addition. The vimana of the shrine is of the tritala type and contains Kūta, sinihalalāta, panjara, simhalalāta, pañiara, simhalalāta and Kūta in each tala.

There are nandis in the four corners on the phalaka. The Gala above is high and decorated with simhalalātas in the four cardinal directions. Above it are a round sikhara of the Vēsara order and a Kalasa. The interior of the shrine consists of the Garbhagṛha, two antarālas before it and two maṇṭapas beyond. The outer maṇṭapa which is closed by walls, contains a perforated screen in the east wall and four black granite pillars in the centre. To its west is the mukhamaṇṭapa partly closed on the sides and with an entrance in the north and south. There are four rows of four pillars each in this maṇṭapa with an elevated square between them and a nandi in its centre. The entrances of the antarālas and the Garbhagṛha are plain. The sanctum contains the linga of Tripurāntakeśvara set up on a low vēdi.

There is a small Devī shrine to the north of the shrine of Tripurāntakesvara connected with it by a short covered verandah emanating from the northern passage of the mukhamantapa. This Devī shrine consists of the Garbhagrha, antarāla and a narrow

compartment before it. The outerside of its walls is plain. The vimāna of the shrine is of the dvitala type and contains rows of the series— $K\bar{u}$ ta, $K\bar{u}$ ta, $S\bar{a}l\bar{a}$, $k\bar{u}$ ta and $k\bar{u}$ ta. The phalaka has lions at the four angles. The gala is adorned with simhalalāṭas. The sikhara above is round and of the Vēsara order. Inside the Garbhagṛha there is a fine image of Devī standing holding trisūla in upper right hand, damaru in the upper left and utpala in the two lower hands.

Great temple—Pālampeṭa (to face p. 49)

THE TEMPLES OF PALAMPETA

Pālampēta is a small village in the Mulug taluk of the Warangal district, situated about 40 miles north-west of Hanumakonda in the Warangal district of Andhra Pradesh. It is near the bund of the famous Rāmappa lake which has a total area of 71 square miles and a semi-circular chain of hills connected by an earthen dam 2000 feet long, 15'20" wide and 56' high, constructed in the 13th century in the Kākatīva period. About a mile from the village and midway between it and the tank is the Rudrēśvara temple built by the famous Kākatīva general. Rēcerla Rudra, in S. 1135 (1213 A.D.) during the reign of Kākatīya Ganapatideva. This general constructed a big tank and a town Atukuru on the tank bund and the temple Rudrēśvara in that town. He gifted two villages, named Upparapalli and Borlapalli for the enjoyment of this god and Gaurīśa. This Rudrosvara temple is a master-piece of architecture and is taken to mark the climax of medieval Deccan architecture. Besides this main shrine, there are seven other smaller ones round it

An inscription on the four sides of a slab set up in the entrance mantapa of the court yard of the Rudresvara temple, gives interesting details about the builder of this temple and his In the famous Recerla family was born Brahma, a celebrated general of the Kākatīya king, Prola I (1030-1075 A.D.) This general accompanied the Western Calukyan armies which were pursuing the Cola forces, defeated in the battle of Koppam, to Kanci and tore the gateways of that city open as if it were a mere curtain and obtained victory for his Kākatīya master.(27) In this family were born Kātaya and his son, Kāma, who, as the general of the Kākatīya king, Prola II, (1110-1158) killed Gunda. ruler of Manthani(28), previously humiliated by Prola. This general begot by Prolamba a son named Rudra. Rudra was one of the greatest Kākatīya generals of his time and rendered signal service to the Kakatiya kingdom. After the sudden and premature death of king Mahadeva in a battle with the Yadavas of Devagiri, his son and heir, Ganapatideva, was captured by the enemy. advantage of this misfortune, several enemies and feudatories created confusion in the Kākatīya kingdom, between 1198 A.D.,

^{27.} Kak. War., p. 33

^{28.} Ibid pp. 43-44

the year of Mahādēva's death and 1202 A.D., by which year Ganapatideva was back in his kingdom and peace and order were restored. During these critical days, Recarla Rudra drove away all the enemies, put down all rebels and preserved the Kakatiya kingdom from imminent dissolution. He handed it over in tact to Ganapatideva. (23) This general was a pious devotee of Siva and installed god Rudreśvara in Orugallu, the capital of the Kākatīyas and gifted to that god the village of Nekkonda. built a big town and created a lake near it, as if to reflect its beauty. In this town of Atukuru he built a fine temple and installed in it god Rudrēśvara in S. 1135 on Sunday, the eighth day of the bright half of the month of Magha in the cyclic year Srīmukha and gifted to that god the villages of Upparapalli and Borlapalli. He also gifted the Village of Nadukude jointly to gods Kātēśvara and Kamēśvara, obviously named after his parents and to god Rudreśvara, set up by him and named after himself.(3")

THE RUDRESVARA TEMPLE

This temple is situated inside a compound of low walls on the bank of a narrow canal, originating from the Rāmappa lake. It faces the east and consists of the Garbhagṛha, Antarāļa, a big Mukhamanṭapa and three porches leading into the manṭapa. The temple is complete in all parts and has an upapīṭha and adhiṣṭāna or double platform below and a tall vimāna above (Pl-XVI-1&2).

1. Upapītha:

This lowest member on the elevation is 5'7" high and consists of upāna, paṭṭa, paṭṭa with semi-circular elevation at each end, moulding, four narrow paṭṭas, tripaṭṭa, gaḷa, tripaṭṭa, moulding with three paṭṭas, gaḷa, three broad paṭṭas, another gaḷa, three paṭṭas, moulding and āliṅgapaṭṭikā. On the top of this upapīṭha there is a pradakṣiṇa about 8' wide.

2. Adhi ytana:-

This upper base is 4' high and situated inside the pradaksina and consists of upāna, recess, three paṭṭas, moulding, four paṭṭas, gaļa, moulding in three sections, broad paṭṭa, moulding, three paṭṭas, gaļa and ālingapaṭṭikā.

^{29.} Ibid pp. 39-40

^{30.} CII, no. 41

3. Porches:-

There are three porches in the east, north and south leading into the mukhamantapa. There is a low $v\bar{v}d\bar{t}$ above the adhistana running on the east, south and north with openings in the porches and in two sections in the west, one on either side of the Antarāla. This $V\bar{e}d\bar{t}$ is decorated on the outerside with four bands, the lowest containing a row of elephants, the second a row of eight petalled lotuses in compartments, the third a row of fine figure sculptures and the top band containing a row of four petalled lotuses. These bands are the same all over except for the fact that the figure sculpture varies. East Porch (Pl. XVII-1)

projecting from one another. Above it are a finely carved pillar, recess, with a miniature vimāna of four talas on a pilaster and a Nāgara sikhara, another finely carved pillar on each side with nandi facing the west in the centre. Above is a projecting band in three sections each decorated with pearl hangings. Then there is a narrow recess. Above is a broad band containing the figures of a man kneeling with his hands in a njali, elephant, man running in consternation, elephant, Bhairava, elephant, elephant with the tip of its trunk resting on the underside of the foot of a man, man with the right leg placed behind with the right hand holding a sword above the head and the left holding a shield, elephant catching the thigh of a man before it and man with a sword in the upraised right hand and a shield in the left. Above this is another band with eight pilasters and the figures of a lion, swan, lion with forepaw raised, swan, lion, swan and lion.

Above this is the lowest of the three shrines in the vertical row. There are double pillars on each side with a square projection on each containing a small niche. Eech pillar has a roll capital with a hole on the underside. These pillars support a projecting kapōta or cornice in three sections, with a row of lotus buds hanging on the underside. The second and third shrines are similar though smaller. On the sides there are fret work frames with holes.

- (6) Projection with two pilasters.
- (7) Projection with two pilasters.
- (8) Recess with a miniature vimāna of five talus on a pilaster.
- (9) Projection with four pilasters with a $s\bar{a}l\bar{a}$ above the two central pilasters.
 - (10) Recess with a miniature vimāna.
 - (11) Projection as in (9) above.

West or back wall:-

The decoration on this wall on either side of the three shrines in the centre is similar to that of the south wall.

The adhistāna of these shrines has on each side two pillars and two miniature vimānas on pilasters. The front side contains in a row a pillar, a miniature shrine on a pilaster, nandi, a miniature shrine on a pilaster and a pillar. Above is a projecting band

with pearl decoration and above it is a recess. Then there is another band which has two elephants, a makarā, elephant and makara on the east and west sides and makara, elephant, makara, elephant, two makaras from whose mouths emanates a creeper forming three arches with the figure of Surya below the central arch, elephant, makara, elephant and makara. There is another band above which has the figures of: four lions in three compartments in the sides and two lions, lion, swan, swan, lion and woman fighting a lion in the front. Other details are the same as those of the shrines on the south wall. There are three Nāgara vimānas on the architrave above the entrance of the Garbhagrha of the lowest shrine.

North wall of the Garbhagrha:—

The decoration on this wall is similar to that of the other two walls.

The miniature vimānās on the bands of the adhintāna of the vertical row of the three shrines contain Nāgara šikharas. These shrines are similar to those on the other two walls.

FIGURE BRACKETS

There are thirty eight figure brackets attached to the short pillars which are on the $v\bar{v}d\bar{\imath}$ on the three sides of the Mukhamantapa, which support the heavy roof above. These brackets are of the following description (Pl. XVIII, XIX & XX):—

East porch - front side - above the north block -

- (1) Woman standing under a tree with the right leg stiff and the left foot across the right knee, with bow in the left hand and the right hand hanging. A man to left picks out a thorn from the underside of her left foot.
- (2) Woman in the *Bhujangatrāsa* pose with the left palm below the left breast and the right palm resting on the head. There is a man on either side at bottom playing the *mrdanga*.

East porch - North side -

(1) Elephant below with the trunk stretched, lion above with its right leg resting on the head of the elephant and the left leg

on the tip of its trunk and the two forepaws upraised. There is a man below the left forepaw.

East porch - front side - above south block -

- (1) Woman in Vytyastapāda under a tree with the left hand below the abdoman and the right upraised holding lotus with stalk.
- (2) Woman in *tribhanga* with a snake coming down her shoulders and on to the thighs, holding another snake up in both the hands above the neck.

East porch - South side.

- (1) Two yālis as on the north side.
- (2) Piece at right angles to the above two yālis.
- (3) Piece to south connecting the east and south porches $2 y \bar{a} lis$.

South porch - front side - east block.

- (1) Woman standing under a bower in $Vytyastap\bar{a}da$ with bow in the left hand.
- (2) Woman in the *Bhujangatrāsa* pose with the left palm touching the right breast and the right hand held up in vismaya.

South porch - front side - west block.

- (1) Woman in tribhanga with the feet facing opposite directions and the hands at kati.
- (2) Woman in the Bhujangatrāsa pose with both the hands raised up in vismaya.

South porch - West side. Two yālis.

South porch - connecting piece. Two yālis.

Piece connecting with the wall of the Antarāla - Two yālis.

Piece adjacent to the one connecting the north porch-Two $y\bar{a}lis$.

Piece connecting above with north porch Two yālis.

North porch - front side - west block.

- (1) Woman in Vytyastapāda with the left palm between the breasts and the right held up in vismaya.
- (2) Woman in dvibhaiga with both the palms behind the head.

North porch - front side - East block.

- (1) Woman in the Bhujangatrāsa pose with both the hands upraised in Cinmudra.
- (2) Woman in Vytyastapāda with the right hand held up in vismaya and the left palm on the abdoman. There are a man to right and womam to left holding up a garland flowing across the lower part of her legs.

North porch - East side-Two yālis.

Piece adjacent to the above—Two yālis.

Piece connecting the above with the East porch—Two yālis.

Sculptured slabs:-

These are in pairs on either side of the entrances of the porches.

The slab on the right side of the entrance of the east porch (Pl. XXI-I) contains the figure of a woman standing under a creeper in tribhanga holding a plant in both the hands. She wears patra-kuṇḍalas, broad graivēyaka, hāra, girdle, with pearl hangings and ardhōruka. There is a cāmaravāhinī in dvibhanga to right. The slab on the left side contains (Pl. XXI-2) the figure of a woman in the Bhujangatrāsa pose with the right hand hanging holding a piece of cloth, and the left elbow resting at kaṭi. Two plaits of hair hang to the sides. She wears cakrakuṇḍalas, graivēyaka, hāra of pearls, broad girdle and ardhōruka. There is a woman on each side at bottom playing mrdanga.

The slab on the right side of the entrance of the south porch contains the figure of a woman (Pl. XXII-1) in Vytyastapāda with a cāmara held above the head in the right hand and the left palm resting on the left thigh. She wears cakrakuṇḍalas, hāra, broad girdle, and a long garland of beads hanging from both the shoulders. There is a cāmaravāhinī on each side at bottom and a monkey picking a thorn from the underside of the right foot of the woman. The slab to left contains the figure of a woman (Pl. XXII-2) in Vytyastapāda holding with her right hand above the head a tube from which emerge three lotus buds and hanging the left hand to the side holding a lotus. There is a cāmaravāhinī in vytyastapāda to right and another in dvibhanga to left at the bottom.

The slab to the right of the entrance of the north porch contains the figure of a woman (Pl. XXIII-1) in Vytyastapáda

holding a cāmara above the head in the right hand and the left palm resting on the left thigh. She wears cakrakuṇḍalas, graivēyaka, hāra and broad girdle. A long garland of beads hangs from her shoulders. There are a cāmaravāhinī to right and a cāmaravāhinī and another woman to left at the bottom. The slab to the left of the entrance contains the figure of a woman (Pl. XXIII-2) with the right leg slightly bent and the left leg thrown across the right holding bow in the left hand and arrow in the right. There are a man to right picking a thorn from the under side of her foot with a dagger and a man with cāmara to left at the bottom.

VIMĀNA

The vimāna above the garbhagṛha is partly fallen. Only four talas are visible and each of them contains the distended series of $k\bar{u}ta$, $pa\bar{n}iara$, $k\bar{u}ta$, $pa\bar{n}jara$, $s\bar{a}la$, $pa\bar{n}jara$, $k\bar{u}ta$, $pa\bar{n}jara$ and $k\bar{u}ta$. There is a sukanāsa projecting from the front base of the vimāna and covering the Antarāla below. Its sides are decorated with the series— $k\bar{u}ta$, $pa\bar{n}jara$, $k\bar{u}ta$, $pa\bar{n}jara$ and salā in two talas.

ROOF

There is no kapôta or cornice above the walls. The roof projects about 3 feet forward and contains as many projections as there are on the walls and adhistāna below. The underside is cut by vertical and horizontal rafters into numerous compartments. There are rows of lotus buds hanging.

INTERIOR

The inner side of the $V\bar{e}d\bar{\imath}$ on the edges of the *Mukha-mantapa* is decorated with compartments containing rows of four petalled lotuses.

All the pillars in the mantapa, excepting the four in the centre, are simple. They have five carved bands in the centre and a rectangular block at the base and top. The underside of the phalaka is adorned with lotus leaves. There is a roll and leaf capital above.

Minor Shrines:-

There are seven minor shrines on the widi. The first is to the left of the Antarala and contains only the Garbhugrha. Its dvara is between two pilasters with a dvarapalaka at the base of each,

and a roll and leaf capital above. There are three miniature $vim\bar{a}nas$ on the architrave with two pilasters with a swan above in between them. There is a projecting $kap\bar{o}ta$ with rows of lotus buds on the under side and eight semi-circular elevations above. The padi or base piece is in three projections and the lintel of the upper cross beam contains the figure of Gaṇapati. The second is a shrine of Durgā situated almost in the northwest corner of the $V\bar{v}d\bar{z}$. The third, situated in the north-east corner, is another Gaṇapati shrine. The fourth is to the left of the entrance of the east porch and contains an icon of Bhairava. The other three are in corresponding positions on the southern half of the $V\bar{v}d\bar{z}$. There is a Saptamātṛka slab to the right of the entrance of the south porch.

The Central Pillars (Pl. XXIV, XXV & XXVI-I):-

These pillars are richly carved and contain fine sculptures. Each of them contains generally, from bottom to top (a) an arch on each face at base with a sculptured figure inside (b) rectangular block (c) recess (d) tripația (e) recess (f) broad pația (g) band with creeper design (h) recess with fine round bands containing diamond and bead decoration (i) band with dancers and musicians (j) band with bead hangings (k) Pația (l) recess (m) Pația with figure sculpture (n) circular part richly carved (o) round moulding with pearl hangings, (p) row of swans (q) round part with lotuses (r) circle with lotus buds hanging on the under side (s) Phalaka and (t) roll capital with leaf hanging. These Pillars Contain fine dance sculptures (Pl. XXVI.2, XXVII, XXVIII and XXIX).

Each pillar contains the following sculptures:— Pillar A:— South-eastern angle.

- 1. Band with sixteen *mithunas* in various poses including the sex act.
- 2. Band in eight sections each with a group of dancers and musicians.
- 3. Band with the south face containing Nrtta-Ganapati with two musicians on each side.
- 4. Band with the west face containing a group of six dancers.
- 5. Band with the north face containing one dancer and four musicians.

6. Band with a rectangular block on the north face containing a dancer in the centre with one dancer emanating to each side from her and three musicians on either side.

Pillar B - at the south-western angle.

1. The east face contains a group of eight dancers and the top part contains a band with two dancers emanating from one in the centre and three musicians to right and two to left.

The top part of the west face contains a man in Vytyastapāda with bow in the left hand and arrow in the right with two women on either side.

The top part of the north face contains the Samudra-madhana.

Pillar C - in the north-west corner.

The top band of the east face contains Gopīvastrāpaharaņa while that on the south face is decorated with two dancers in the centre accompanied by two musicians on either side. The top part of the west face contains Samudramadhana with Lakṣmī coming out of the ocean while that of the north face contains three dancers with two musicians on each side.

Pillar D at the north-eastern angle.

The top band of the east face of this pillar contains two dancers and three musicians. The top band of the west face is adorned with a dancer, woman playing mrdanga, dancer, woman playing mrdanga, dancer and woman playing mrdanga in a row.

The underside of the ceiling above the pillars has fine sculptures. (Pl. XXX).

Antarāļa entrance.

This consists a pilaster and a jamb on either side of the entrance which contain fine sculptures.

The padi or base piece consists four compartments under each jamb and seven in the centre. The compartments below the right jamb contain (1) man with sword in the right hand standing behind a square shield (2) woman in dvibhanga holding $s\bar{u}la$ in the right hand (3) woman in $Vytyastap\bar{u}da$ with the right hand hanging and the left holding a bundle of lotus leaves and (4) woman holding a bag in the right hand and a round object in the left.

The compartments below the left jamb contain the figures of (1) woman in dvibhanga holding a suckling child in the right hand and a round object in the left (2) woman in Vytyastapāda holding bow and arrow in the right hand and keeping the left in varada (3) woman in Vytyastapāda holding a stick in the right hand and a plant in the left and (4) man with sword in the right hand standing behind a square shield.

The compartments below the padi contain the figures of (1) woman in dvibhanga with the left leg slightly bent holding a snake in the two hands lifted above the head (2) woman in Vytyastapāda holding a stick in the left hand and a bag in the hanging right hand (3) woman in Vytyastapāda holding a lotus in the right hand (4) Cāmaravāhinī in dvibhanga (5) woman in Vytyastapāda as in number (2) above and (6) woman in dvibhanga holding a long object in both the hands raised above the head.

The bases of the jambs also contain fine sculptures. The base of the right jamb contains the figures of (1) woman standing under a tree with a monkey on one branch, with the left leg behind the right, with the right palm on the knot of the hair and the left on the stomache. (2) woman in dvibhanga with the right palm on the head and the left on the leg (3) woman holding a bow in the left hand (4) woman holding lotus in the right hand and keeping the lelft palm on the right breast and (5) woman in dvibhanga with the right hand held up in vismaya and the left resting on the stomache holding an object. The base of the left jamb contains (1) woman standing with the right leg behind the left and with the right hand held above the head (2) woman in dvibhanga with the right hand held above the head (3) woman in the above pose with the left palm on the right side of the waiste (4) woman in tribhanga with the right leg behind the left standing on the tips of the toes and with the left hand held above the head and the right palm on the abdoman and (8) woman in dvibhanga with bow on the left shoulder and the hands in aniali.

The portion above the jambs contains fretwork frames with circles containing the figures of dancers and musicians. The pillars have similar medallions with dance sculptures all over.

The verticals and cross beam of the dvāra are decorated with diamond cutting and the lintel has the figure of Gajalakṣmī. The architrave above contains the figure of Naṭarāja in the centre and Gaṇapati and Dēvī at the extremes. In between are four dancing deities on each side.

The Garbhagrha:—

The jambs on either side of the entrance of this structure are in four sections containing (1) vertical row of musicians and dancers (2) vertical row of lions with an elephant at the base (3) pillar and (4) vertical with creeper design.

The verticals of the dvāra have pūrṇakumbhas at the base and diamond cutting all over. The lintel is carved into a miniature shrine. There is a projecting canopy above with a row of lotus buds hanging on the underside. The architrave above contains five miniature vimānas. There is a projecting plank along each side wall in the interior and a moon stone before the padi of the entrance.

The central band of the $V\bar{v}d\bar{v}$ above the adhistana is decorated with figures in dance poses (Pl. XXXI & XXX II).

SHRINES IN THE COMPOUND OF THE RUDRĒS'VARA TEMPLE

I. Shrine opposite the north porch.

This shrine, which is partly ruined, consists of the Garbhagrha, Antarāla and the mukhamantapa with a porch and faces the east.

Its upapītha is buried and covered by the fallen stones. The adhiṣṭāna consists of upāna, recess, moulding, recess and ālingapatṭikā with semi-circular hangings along the edge.

The walls are decorated on the outer side. The north and south walls contain pilaster, miniature vimāna of seven talas on a pilaster, pilaster with a miniature shrine with Nāgara sikhara, miniature vimāna on a pilaster, pilaster, miniature vimāna on a pilaster, miniature vimāna on a pilaster, wide pilaster with a miniature shrine having a Nāgara s'ikhara, miniature vimāna on a pilaster, pilaster and pilaster. The back wall on the west is decorated with pilaster, miniature vimāna on a pilaster, pilaster, miniature vimāna on a pilaster, miniature vimāna on a pilaster, miniature vimāna on a pilaster, wide pilaster containing

a miniature shrine with Nāgara sikhara, miniature vimāna on a pilaster, miniature vimāna on a pilaster and pilaster.

There is a projecting canopy above the walls with five rows of lotus buds hanging on the under side.

The greater part of the *vimāna* of the shrine is fallen. Only the first tala is intact and it contains the series – $k\bar{u}ta$, $k\bar{u}ta$, $s\bar{a}l\bar{a}$, $k\bar{u}ta$ and $k\bar{u}ta$. There is a Śukanāsa projecting from its front base and covering the Antarāla below.

The mantapa has a low $v\bar{v}d\bar{\imath}$ on three sides decorated on the outer side with two bands of lotuses.

There are a nandi and a damaged icon of Ganapati at the entrance of the mantapa. There are four central pillars inside, plain and simple. The beams above these pillars contain lotus, on the underside. The jambs of the entrance of the Antarāla and the Garbhagrha contain sculptures at the bases and fretwork frames above. There is a projecting canopy above the entrances of the two structures. The architrave above the entrance of the Antarāla has the figure of Naṭarāja dancing in the Bhujangatrāsa pose in the centre and musicians on either side. There are projecting planks along the three walls of the Garbhagrha.

II. Shrine opposite the East porch.

This is almost entirely in ruins and only the high adhistana and the parapet decorated with bands of lotuses are in tact.

III. Mantapa opposite the south porch.

Only two elephants, one on each side of the entrance, are in tact.

IV. Ruined mantapa adjacent to the above mantapa.

SHRINES OUTSIDE THE RUDRES'VARA TEMPLE

There are many shrines outside the main temple in varying conditions of preservation.

I. Shrine at the eastern end of the tank bund.

This is a small but interesting structure and a replica of the main temple in plan and general features. It consists of the

Garbhagrha, Antarala and Mukhamantara with three porches and faces the west.

The adhistāna consists of upāna, patta, recess, broad patta moulding, recess, dvipatta, gaļa, moulding and ālingapattikā.

The walls of the shrine are plain but for a band of elephants at the base. The roof projects forward and there are two rows of lotus buds along the edges on the under side.

The porches contain a $v\bar{v}d\bar{\imath}$ above the *adhistāna* decorated on the outerside with a band of elephants, a band of lotuses and a projecting flat cornice. There are two pillars in the front and four at the back on this $v\bar{v}d\bar{\imath}$ supporting the roof above in each porch.

There are four central pillars inside the mantapa adorned with sculptures. One pillar contains the figures of (1) a woman dancer accompanied by a woman playing mrdanga on each side (2) woman in dvibhaiga holding a snake in both hands above the head with a woman in the Bhujangatrasa pose to right holding up a vīnā and another to left playing a vīnā. (3) woman in dyibhanga with cāmara in the upraised right hand and a round object in the left. There is another woman in dvibhanga, with both hands holding round objects and raised above the head. A third woman is in the same posture with the right hand kept behind the back and the left holding a long object and (4) nude Jaina Tīrthankara with a woman on either side keeping the hands in anjali. The second pillar contains the figures of (1) woman in the Bhujangatrasa pose with the right palm on the head and the left on the stomache with a woman playing mrdanga on either side. (2) Nrtta-Ganapati (3) woman holding cāmara in the right hand and a bag in the left with a cāmarayāhinī on either side and (4) woman dancer in the centre with one dancer emanating from her to each side. The third pillar contains the figures of (1) woman in the Bhujangatrasa pose with the hands held above the head and with a woman playing mrdanga on either side. (2) woman in dvibhanga with a fish in the two hands with a camaravahini and a boy (3) two camaravahinīs and (4) woman in the Bhujangatrāsa pose with the right palm on the head and a woman playing mrdange. The fourth pillar contains the figures of (1) woman in the Bhajangatrasa pose with the right palm on the head and the left on the abdoman and a woman playing mrdanga on either side (2) two

women dancers emanating to the sides from another in the centre with her hands in $a\dot{n}jal\bar{\imath}$ kept above the head. The dancers on the sides hold bag in the right hand and keep the left palm on the head (3) woman in the $Bhuja\dot{n}gatr\bar{a}sa$ pose with the left palm on the head and the right below the right breast. There is a woman playing mrdanga on either side and (4) woman playing $v\bar{\imath}n\bar{a}$ with the right leg behind the left. A woman stands to right with the right hand held up in vismaya and the left palm on the abdoman.

The underside of the ceiling contains nine compartments. That part above the four central pillars has treble lotus with a bud in the centre.

The entrance of the Antarāla is well carved. The padi or base piece is in three sections, the central one projecting. The base of the right jamb contains the figures of a cāmaravāhinī in Vytyastapāda and two women with the right palm on the head and the left on the abdoman. The base of the left jamb contains the figures of a woman in dvibhaṇga with a bag in the left hand, a woman in tribhaṅga with the right hand upraised and the left resting on the right thigh and a cāmaravāhinī in vytyastapāda. There is a fretwork frame above each jamb. The verticals of the dvāra contain a cāmaravāhinī at the base and diamond cutting all over the cross beam similarly carved.

The lintel contains a figure of seated Ganapati. There is a projecting canopy above the $dv\bar{a}ra$ in three sections. The architrave above it has five miniature $vim\bar{a}nas$.

The entrance of the Garbhagṛha is also carved. There are a cāmaravāhinī and a dvārapālaka at the base of the right jamb and cāmaravāhini and S'iva at the base of the left jamb. There is another cāmaravāhinī at the base of the two verticals.

There is a miniature shrine on the $v\bar{v}d\bar{t}$ in one corner. The base of each jamb of the entrance of this shrine contains the figures of a $dv\bar{a}rap\bar{c}daka$ and two $c\bar{a}marav\bar{a}hin\bar{v}s$. The architrave above the entrance has three miniature shrines. Inside is a fine icon of Vinu.

II. Three shrines at the western end of the tank bund.

Shrine A:—

This is partly in ruins and contains only the Antarāla and the Garbhagrha. The dvāra of the antarāla has a jamb and a pilaster

on either side. The bases of the jambs contain a few sculptures(1) woman in Vytyastapāda holding a long object in the hands above the head and man in dvibhanga holding dagger in the right hand and raising the left up in vismaya. (2) group of women under a tree, one with the right foot thrown back from which a monkey picks a thorn, another in dvibhanga with the hands in anjalī and a cāmaravahinī in vytyastapāda. (3) woman in Vytyastapāda holding up a snake in both the hands and another holding snake in the right hand and keeping the left palm below the right breast. (4) two women in vytyaspāda holding cāmaras in the right hands and keeping the left hands on the right thighs. There is another woman in dvibhanga with her hands in anjali.

The padi is in three sections and the cross beam has a lintel adorned with the figure of Gajalaksmī.

The entrance of the Garbhagrha contains a jamb and a pillar on either side. The base piece of the right jamb has the figure of Viṣṇu standing in tribhanga. There are a man and a woman to right and a woman to left. The base piece of the left jamb has the figure of Viṣṇu in Vytyastapāda with two women on either side. The padi has a semi-circular projection in the centre and the cross beam has five projections with two rows of lotus buds hanging on the under side. The lintel has a figure seated in the dhyāna pose. Inside the Garbhagrha there are plank shelves along two walls and a projecting canopy against the back wall. There are four pilasters in the four corners and a band of lotus petals at the top of each wall.

Shrine B: -

This shrine too contains only the Garbhagrha and the Antarāla. The base of the right jamb of the entrance of the Antarāla contains the figures of three women standing under a tree, one in Vytyastapāda with hands akimbo, one in the same pose holding a cāmara and the third with the right leg behind the left and with the right hand hanging and the left palm on the abdomen. The jamb to left contains at its base the figures of one woman in Vytyastapāda with a parrot, another combing the hair looking into a mirror and the third offering a fruit to a parrot. There are fret work frames above the bases. The verticals are decorated with diamond cutting and the lintel contains the figure of Gajalakṣmī. There is a canopy above in three projecting sections.

The entrance of the Garbhagrha is guarded by dvārpālakas and cāmaravāhinis. There is a projecting canopy above in three sections with three rows of lotus buds on the underside. There are plank shelves along each of the walls.

Shrine C:-

This is a triple shrine facing the east and is in a ruined condition. There is a low $v\bar{e}d\bar{i}$ on the $adhi\bar{s}t\bar{a}na$ which is now buried. The roof projects from the walls and contains rows of semi-circles on the under side.

The central maniapa has four plain pillars with a raised part between them.

The bases of the jambs of the entrances of the Antarālas of the shrines contain the figures of woman with bow and sword, $C\bar{a}marav\bar{a}hin\bar{\imath}s$, women with hands in $a\dot{n}\,jal\bar{\imath}$, woman holding a snake in the two hands, woman standing under a tree and picking a thorn from her foot and a woman holding a bundle of buds.

All the shrines have architraves decorated with a row of five miniature vimānas. There are a number of loose icons in the mantapa and a Saptamātrka slab with S'iva and Gaṇapati at the ends.

III. Triple shrine to the west of the main temple.

This shrine has a central mukhamantapa, shrines on the north, west and south and a porch in the east. There is a low $v\bar{e}d\bar{i}$ above the adhistāna connecting these shrines and its outer side, which is in eight sections, is decorated as follows:-

- (a) This is to the right of the entrance of the porch. This has two panels, one containing the figure of a $D\bar{e}v\bar{i}$ seated in $V\bar{i}r\bar{a}sana$ with a lotus in the right hand and the other containing panels of women dancers.
- (b) This is at right angles to (a) and contains a band with seven miniature $vim\bar{a}nas$ and another containing four compartments with women dancers and S'iva seated in $V\bar{\imath}r\bar{a}sana$ holding $tris\bar{\imath}ula$ and damaru in two hands and keeping the other two in abhaya and Varada with a $c\bar{a}marav\bar{a}hin\bar{\imath}$ on either side.
- (c) This is to the west of the southern shrine and contains one band with seven miniature *vimāna*s of five *talas* with a conical central band and *āmalaka sikhara* and another band with nine compartments, each with a lion with a fore paw raised.

- (d) Like (c) above.
- (e) This is to the north of the back or western shrine and contains one band with five miniature $s\bar{a}l\bar{a}s$ and five miniature $vim\bar{a}nas$ with horizontal bands. There are the figures of Siva seated in $V\bar{i}r\bar{a}sana$, two dancers, a bearded sage and a woman playing mrdanga. The second band contains a row of lions.
- (f) This is at right angles to (e) above. It has one band containing six miniature $s\bar{a}l\bar{a}s$ and four miniature $vim\bar{a}nas$ with horizontal bands with dancers below them. The second band has a row of lions.
- (g) This is to the east of the northern shrine. One of its bands contains seven miniature shrines and the figure of a four handed D = vi seated in V = rasana. The second band has the figures of dancers.
- (h) This is to the left of the entrance of the porch. One of its bands contains ten miniature shrines and the other the figures of dancers and wrestlers.

There are long fret work frames connecting the $V\bar{e}d\bar{i}$ and the roof.

All the three shrines have only the Garbhagrha and no Antarāla. The base of the jambs of the entrance of each Garbhagrha has dvārapālakas and cāmaravāhinis and a projecting canopy above. The architrave contains five miniature vimānas each with central conical band. The entablature above the central pillars of the mantapa contains compartments decorated with the figures of dancers.

1V. Shrine to the north-west of the main temple.

This is a small shrine with Garbhagṛha, Antarāla and Mukhamaṇṭapa. The walls are plain. The bases of the jambs of the Antarāla contain fine sculptures and above them are fret work frames. The architrave contains a row of miniature vimānas each with a central conical band. The base of the entrance of the Garbhagṛha contains figures of Dvārapālakas. There is a treble lotus on the under side of the ceiling above the four central pillars of the mantapa.

V. Shrine to the West of No. IV.

This too is a small shrine with Garbhagrha and Antarāla. The Adhistāna is buried in the ground.

The entrance of the Antarāla contains pūrņakalasas at the base and fret work frames above them on either side. There is Gajalakṣmi on the lintel and a projecting canopy above. The entrance of the Garbhagṛha is plain.

The vimāna of the shrine contains semi-circular elevations on each of its ten steps and a square phalaka above them. There is a platform at its front base, probably part of a sukanāsa. There is a conical band in the centre of each step of the vimāna.(51)

^{31.} For a brief notice of these temples see the guide book published by the Archaeological Department, Andhra Pradesh.

THE TEMPLES OF GHANAPÜR

Ghanapūr is a village situated eight miles north-east of Pālampet and fifty miles north-east of Warangal in the Warangal district of Andhra Pradēsh. It can be reached by bus from Warangal and Hanmakonda. There is a mud fort, 260' square, in this village inside which are to be found twenty-two shrines of great architectural value.(*2) No detailed account of these temples is available so far.

The main shrine, dedicated to Siva, is in the centre of the fort. There are a mantapa and three shrines to the east, three shrines and a mantapa to the south, eight shrines to the west and five shrines to the north of the main temple. These shrines have vimānas of different types and this reminds one of the group of Early Cāļukyan shrines at Pāpanāśanam near Alampūr, in Āndhradēśa and Aihole, in northern Karnāṭaka.

The Main Shrine

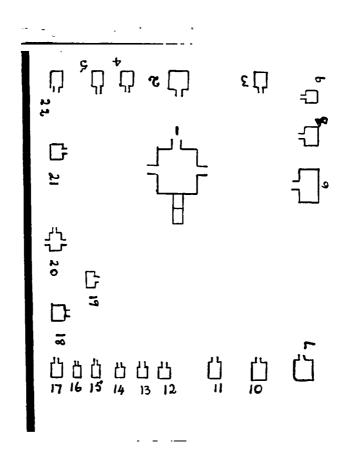

This shrine, which resembles the great temple at Pālampet in size, plan and construction, is one of the bigger temples of the Kākatīya period. It measures 92'6" from west to east and 55' from north to south and faces the east. It consists of the Mukhamantapa with three porches in the east, north and south and the Antarāla and Garbhagrha, in the west. It is situated on a double platform and has no vimāna above the Garbhagrha, (Pl. XXXIII-1).

Upapītha:-This lowest member on the elevation is well carved and consists of upāna, recess, Dvipaṭṭa, recess, paṭṭa, recess, tripaṭṭa, gala and āliṅgapaṭṭikā. On the top of this platform is a pradakṣṭṇa, about 9 feet wide.

Adhistāna:— This upper platform, situated inside the pradaksiņa, mentioned above, contains upāna, patta, dvipatta, three pattas, recess, dvipatta, three pattas, gaļa, and ālinga-pattikā.

Porches:— Each porch has a base decorated with a band containing a row of elephants, a band with full lotuses and a flat cornice. Above the base is a low parapet or $v\bar{v}d\bar{i}$ containing a band with figure sculptures in compartments between pilasters, a band with four petalled lotuses and a wide flat band, from bottom to top.

^{32,} For a brief notice of these temples see Annual. Rept. of the Hyd. Arch. Dept. for 1931-33.

The temples of Ghanapur (to face p. 82)

Pillars: There are short pillars on this parapet supporting the roof. These pillars contain five bracket figures as in the Palampet temple. The figures on the right side of the east porch have disappeared. The pillars above the piece connecting the eastern and southern porches contain an elephant below, a yāli above it and a human figure coming out of the mouth of the yāli (Pl. XXXIII-2), and two more yāli brackets. The figures on the front side of the southern porch have fallen. There are two vāli brackets on the pillars above the piece connecting the porch with the wall of the Antarala. One of the brackets of the part of the north porch contains the figure of a weman standing in dvibhanga, with her hands held up above the head and another, the figure of a woman in the Bhujangatrasa pose with hands held above the head. There is one yāli bracket standing on the left side of the east porch. Many broken pieces of these bracket figures lie scattered on the ground alround.

Walls of the Antarāla:— There is a band containing a row of elephants at the base of each wall above the adhistāna. Both the northern and southern walls of the Antarāla are finely decorated. Each of them contains (a) a projecting plain part (b) a miniature vimāna on a pilaster below an arch of creepers, the vimāna containing a vertical row of seven flat bands marking so many talas and a round sikhara (c) projection with a pilaster containing at its base, the figure of Siva with a woman dancer on either side, (d) recess with a miniature vimāna on a pilaster (e) projection with a pilaster containing at its base the figure of a woman dancer with a woman on either side playing the mrdanga (f) recess with a miniature vimāna on a pilaster (g) projection with a pilaster and (h) recess with a miniature vimāna on a pilaster vimāna on a pilaster.

Walls of the Garbhagrha: The three walls of the Garbhagrha are also well decorated (Pl. XXXIV-1 & 2).

The decoration on the north wall is in five parts - (a) a wide projection with a pilaster in three sections projecting from each other. The central part of the outermost pilaster is decorated with lotus and pearl hangings. There is a niche at the base of the pilaster under a creeper arch containing the figure of Siva in the Bhujangatrāsa pose reversed. He holds trisūla and damaru in the upper hands, keeps the lower right in abhaya and holds a round object in the lower

left. (b) recess with a miniature vimāna on a pilaster under a creeper arch, the vimāna containing five talas and a round sikhara (c) projection with a pilaster in three sections (d) recess with a miniature vimāna on a pilaster, the vimāna containing seven talas and (e) projection with a pilaster in three sections containing at the base a woman dancer in the centre with one woman dancer emanating from her to each side.

The decoration on the back wall is in nine sections (a) projection with a pilaster containing at the base one woman dancer in the centre with a woman dancer emanating from her to each side (b) recess with a miniature vimāna on a pilaster (c) projection with a pilaster (d) recess with a miniature vimāna on a pilaster (e) projection with a pilaster containing a niche under a creeper arch and having a defaced sculpture inside (f) recess with a miniature vimāna on a pilaster (g) projection with a pilaster (h) recess with a miniature vimāna on a pilaster and (i) projection with a pilaster.

The decoration on the south wall is similar to that on the north wall. The niche at the base of the wide pilaster contains the figure of S'iva dancing in the catura pose, holding damaru and $tris\bar{u}la$ in the upper hands, $aksam\bar{a}l\bar{a}$ in the lower right and a round object in the lower left. Above is a band depicting one woman dancer in the centre with a woman dancer emanating from her to the sides, one woman dancer and a woman playing the mrdanga on each side beyond.

The Interior:— The innerside of the parapet on the edges of the Mukhamantapa contains a gala cut into compartments, each having a lotus of four petals. There are five minor shrines, one on either side of the entrance of the Antarāla, one on the western section of the northern porch, one on the northern section of the eastern porch and one on the eastern section of the southern porch, on the parapet, as in the great temple at Pālampet. The roof of the mantapa has fallen. (Pl. XXXV-1)

The entrance of the $dv\bar{a}ra$ of the $Antar\bar{a}la$ is fine. There are five finely sculptured figures at the base of each jamb and the portion above contains fretwork frames with three rows of circular holes and two rows of men in dance poses. The verticals of the $dv\bar{a}ra$ contain one horizontal row of men and another of women in fine dance poses. The architrave above contains, in the centre, the

figure of S'iva dancing in the Bhujangatrāsa pose in the reverse, two deities, Kumāra, Brahmā and a woman, to right and a woman, Viṣṇu, two deities and Gaṇapati to left. There is a projecting canopy above the $dv\bar{a}ra$. The base piece below is in three sections the sections at the ends containing the figure of a woman dancers each.

The Garbhagrha is 14' square and has an entrance finely carved. The base piece is in three sections, the central projecting section containing a woman dancer accompanied by a woman on either side playing the mrdanga. The base of the jambs has a woman in tribhanga, a cāmaravāhinī, a four handed dvārapālaka and another cāmaravāhinī. Above are vertical rows containing men in dance poses, lions, a pilaster with a woman at its base holding a snake above and creeper design. The verticals of the dvāra are decorated with the diamond design as is the cross beam. The lintel contains the figure of Gajalaksmī. There is a projecting canopy above the entrance with four lotus buds hanging from the edge on the underside. The architrave above the canopy contains a row of five vimānas, each in three projecting sections, with four horizontal rows of flat bands and a round sikhara. In between these vimānas are four pilasters with miniature vimānas above. In the interior of the Garbhagrha there is a plank shelf on each of the three walls and a linga in the Somasūtra on a vēdi in the centre.

Minor Shrines and mantapa (Pl. XXXV-2, XXXVI & XXXVII)

There is a mantapa, now in a ruined condition, opposite the east porch of the main shrine.

To the south of this mantapa is a small shrine with Antarāla and Garbhagrha. The mantapa in the front is fallen. It has a vimāna of four talas, each containing the series- $k\bar{u}ta$, $k\bar{u}ta$, $s\bar{a}l\bar{a}$, $k\bar{u}ta$ and $k\bar{u}ta$. There is a Nāgara sikhara with a simhalalāta gable on each face. A gable like Śukanāsa projects from the front base of the vimāna and covers the Antarāla below. There is the series - $k\bar{u}ta$, $k\bar{u}ta$ and $s\bar{a}l\bar{a}$ on each side of the Śukanāsa.

To the north of the mantapa are two shrines. One of them contains an open mantapa with the Garbhagrha beyond and a vimāna of four talas, each containing the series $-k\bar{\nu}_1$, $k\bar{\nu}_2$, $k\bar{\nu}_3$, $k\bar{\nu}_4$, $k\bar{\nu}_4$, $k\bar{\nu}_4$. There is the Śukanāsa above the Antarāļa. The other shrine is similar.

There is a mantapa opposite the southern porch of the main shrine with one minor shrine to its left and two shrines to its right. This mantapa has three porches in the east, west and north. Of the latter, one shrine consists of the Antarāla and Garbhagrha. The entrance of the Antarāla is finely carved and contains fretwork frames. The vimāna above this shrine is of the tritala or three storeyed type and has a Nāgara sikhara with a simhalalāta gable on each face. The sukanāsa before it is fallen. The other shrine contains an open mantapa and the Garbhagrha. There is no vimāna. The other shrine to left is similar.

There is a group of eight shrines to the west of the main shrine. Of these, the first from south to north, contains only the Garbhagrha with a carved doorway. Its vimāna is fallen. second shrine is ruined. The third is partly buried in the ground and contains an open mantapa and Garbhagrha. Its vimāna is of four talas and contains the series - kūţa, kūţa, sālā, kūta and kūta. It has a Nāgara sikhara with a simhalalāța gable on each face. The next shrine is similar. Its vimāna, which is of four talas, is peculiar. Each tala contains five miniature vimānas with a horizontal band in each tala and a central conical band on each face. It has an amalaka sikhara. The fifth shrine has an open mantapa and garbhagrha and vimana of five talas decorated with the series - kūta, kūta, sālā, kūta and kūta. It has a Nāgara sikhara with a simhalalata gable on each face. The next three shrines are similar.

There is a group of five shrines to the north of the main shrine, west to east. The first shrine is ruined. The next contains the Garbhagrha and Antarāla, a vimāna of five talas, a Nāgara sikhara with simhalalāta gables and sukanāsa. The next shrine is a replica of the main shrine with a mukhamantap of three porches, Garbhagrha and Antarāla. The mantapa contains four pillars in the centre. The entrance of the Antarāla has a well carved doorway with jambs containing fret work frames. There are miniature shrines, each with a flat band in each tala and a conical band in the centre, on the architrave above. There are six minor shrines on the vēdī or parapet of the porches. The roof is flat. The shrine next to this contains an open mantapa and the Garbhagrha. The vimāna is of five talas, each containing five vimānas of flat bands and an āmalaka sikhara and sukanāsa. The last shrine of this group is in ruins.

There is one more shrine among trees to the north of this fort area but it is in a very ruined condition.

Reddi Gudi

This small shrine with three porches is at the other end of the village and is partly ruined. It consists of the Garbhagrha Antarāla and Mukhamantapa with four plain central pillars.

The outer side of each wall of the Antarāla is decorated with the series - (a) projecting wall space (b) recess with a miniature vimāna above a pilaster (c) projection with pilaster (d) recess with a miniature vimāna above a pilaster and (e) projection with a pilaster.

The outer side of each of the side walls of the Garbhagṛha is decorated with the series - (a) projection with pilaster (b) recess with a miniature vimāna above a pilaster (c) projection with pilaster (d) recess with a miniature vīmāna above a pilaster (e) projection with a broad pilaster, (f) recess with a miniature vimāna above a pilaster (g) projection with pilaster (h) recess with a miniature vimāna above a pilaster and (i) projection with pilaster. The back wall contains a broad central projection with a pilaster and three sections with two recesses containing a miniature vimāna above a pilaster and one projection with a pilaster on either side of it.

The underside of the ceiling above the four central pillars in the interior contains a treble lotus in a double square. The entrance of the Antarāla is well carved and contains fret work frames. There is a projecting canopy above it. The architrave above contains five miniature vimānas of horizontal bands and a conical band in the centre.

III. The Chāyāsoméśvara Temple, Panagal.

This temple is situated in the fields about a mile to the east of the village of Panagal, in the Nalgonda district of Andhra Pradēsh.³³ It is a triple shrine which is of particular importance on account of the stepped Nāgara vimānas of the shrines which are in tact and the play of shadow inside the Garbhagṛha of the main shrine.

The shrine is situated inside a compound built of large blocks of stone which is now partly ruined. There are three entrances to this compound, one in the east, consisting of a mantapa of four pillars, another in the south, consisting of a long, narrow mantapa and the third in the west, consisting of a two storeyed mantapa. There are six small subsidery shrines in the compound, two in the south, three in the west and one in the north, each with walls on three sides and two pillars in the front.

The main shrine consists of a mukhamantapa with a roofed porch in the south and three shrines to the north, east and west. (Pl. XXXVIII).

There is a low adhistana to be seen in the front consisting of a flat $up\bar{a}na$, deep gala adorned with four petalled lotuses and a flat $\bar{a}lingapattik\bar{a}$. Above this is a $v\bar{e}d\bar{\imath}$, the outerside of which is decorated with a row of elephants, a row of human figures and a flat band.

The $adhistan\bar{a}$ of the shrines is not visible. The walls are built of large blocks of stone. There is no $kap\bar{o}ta$ above the walls.

The vimāna of each shrine consists of twelve steps, a narrow gala and a Nāgara sikhara with a simhalalāta on each face.

There is a row of miniature vimānas on the edges of the roof of the front part of the mukhamanṭapa and the porch. There is a sukanāsa projecting from the front base of each vimāna with a big simhalalāṭa gable in its front.

The entrance of the porch is made of four short pillars and a flight of four steps guarded by elephant trunks.

The Mukhamantapa contains sixteen pillars and the floor in the centre is 8" high. There are four carved granite pillars in the four corners of this square. There is a fine Nandi in it. The

^{33.} For a brief notice of this temple see Ibid 1927-28, pp. 2-6.

underside of the ceiling is divided into nine compartments, the central one containing a lotus.

The three shrines are similar in construction. There is no Antarāla entrance as such but only two pillars in its place. The jambs of the doorway of the Garbhagrha contain the figures of $dv\bar{a}rap\bar{a}las$. The wall on either side contains a $k\bar{u}t\bar{a}g\bar{a}ra$ on two slender pilasters. The lintel of the cross beam has the figure of Gajalaksmi. The architrave above is decorated with a row of miniature shrines. The shrines in the north and south contain only the $v\bar{e}dis$. In the Garbhagrha of the western shrine there is a deep pit filled with water. Inside is a $v\bar{e}d\bar{i}$ and on it the linga of $S\bar{o}m\bar{e}s$ vara. There is a square beam of shadow above the linga on the wall, observable throughout the day time.

The temples of Pillalamarri.

Pillalamarri is a small village situated about three miles to the north-east of Süryāpēṭa, the headquarters of a taluk of that name in the Nalgonda district of Telingāna, in Andhra Pradesh. This village contains three temples which are good examples of Kākatīya architecture. 34

The history of the village can be traced from a few inscrip tions found in its temples and some more found at Nagulapadu. The village was originally situated inside a fortress." which has now disappeared. It was the headquarters of the Recerla family, whose members played a prominent part in the history of the Kākatīya period as generals under Prola I, Rudradēva and Ganapatidēva, well known rulers of the imperial Kākatīya dynasty of Andhradēśa. The earliest known member of this family was Mucca, who was a general of the Kakatiya King, Prola I (1030-1075 A.D.). This general accompanied his master along with the Western Calukyan armies which pursued the Cola army after its defeat in the battle of Koppam, besiezed the city of Kanci and entered it, tearing open its gate as if it was a mere curtain.36 In his family was born Kāta, son of Mucca. This Kāta had a son; named Kāma, who married Kācāmbā and begot two sons, named Beta and Nama.37 Both these brothers were famous for their piety and valour and were subordinates of the Kākatīya kings, Rudradēva and Gunapatidēva. Of these, Bēta married Erramā or Errakasānī, the great-granddaughter of a certain Bhimaya nayaka, the Lord of Sannamguru and the daughter of Komarenāyaka and Erapa. His son was Malla.38 Nāmi Reddi married Aitamā. These chiefs of the Rēcerla family had many titles like Sakaia-Gunagān-ālamkāra, Paranārīdīra, Āmanikamti-puravar-ādhīsvara, Vīralaksmi-nijēsvara, Marbalabhīma, Ranaranga-rama, Vitarana-karna, Patihit-anjaneya, Saucagāngēya, Svāmidiohara ganda, Babanadanda, Satya ratnākara. Mānumakul-āditya.

There are six inscriptions in the temples of Pillalamarii which give the following informations:—

^{34.} For a short notice of these temples see Ibid 1926-27, pp. 1-4.

^{35.} CTI, no. 37

^{36,} Ibid no. 41

^{37.} Ibid nos. 41 and 42

^{38.} Ibid no. 42

^{39.} Ibid no. 41

- 1. Nāmi Reddi, a servant of king Rudradēva, built a trikūṭa (triple shrine) and installed in it gods Nāmēśvara, Kāmēśvara and Kācēśvara, named after himself and his parents, in S. 1117, on a Sunday, the 13th day of the bright half of the month of Vaiśākha in the cyclic year, Rākṣasa. He gifted for the daily worship etc., of these deities 7 martus of wet land under the Sabbi-samudramu and 7 martus of dry land in the village of Gumṭipalli. He made a further gift of 8 martus of wet land under the Visvanātha-samudramu in the village of Nāgulapāḍu to god Nāmēśvara, 2 martus of land in the same village to god Viśvanātha and 3 martus of land in the village of Kudukuḍiya to the triple shrine of Kāmēśvara.⁴⁰.
- 2. Nāmi Reddi built a fine temple and installed in it god Nāmēśvara, named after himself, in S. 1124 on a Saturday, the 14th day of the bright half of the month of Caitra, in the cyclic year, Dundubhi and gifted to the god two tanks, named the Gudlacheruvu and Katyākēcheruvu. He gifted further, 2 martus of land to god Aitēśvara and two martus to god Visvanātha. Nāma's wife, Aitamā, installed a linga of S'iva, named after herself, and gave a vritti to that god; Viśvanātha, a son and Prōla, the sister's son of Nāmi Reddi, also installed lingas of Siva and gifted vrittis. Aitamā further gifted 3 martus of land to god Aitēśvara and two martus to god Viśvanātha.⁴¹.
- 3. Erakasānī, wife of Bēti Reddi, built a beautiful temple in Pillalamarri and installed in it god Erakēšvara, named after herself in S. 1130, on a Monday, the 3rd day of the bright half of the month of Jyēṣṭa, in the cyclic year, Vibhava and gifted to the god 4 martu of wet land behind the Erakasamudramu, also named after her, 46 martus in Krōprolu and Upparlapādu and 12 martus near the Lakṣmaṇasamudramu, excavated by her at Pillalamarri. On the same day, Erakasani installed goddess Tripurādēvī and gifted to her 12 martus ef wet land in Pillalamatri and 2 martus of dry land in Erakapuram. She also gifted 10 martus of land to gods Komarēśvara, named after her father and Erakasamudram on the bund of the Erakasamudram, named after her mother, both installed by her. Mention is made of gods Mācidēva, Bētēśvara and Erakēśvara installed by Imturi Somaya, to whom also gifts were made.

^{40.} Ibid no 38

^{41.} Ibid no. 41

- 4. Erapōtu Lamkamgāru, the governor of Pillalamarri and a subordinate of Kāpayanāyanimgāru, re-installed in S. 1279 on the 13th day of the bright half of the month of jyēṣṭha, in the cyclic year, Hēmalambī, god Erakēs'vara whose linga was destroyed by Sultan Alauddin, for the merit of his father, Anumakonḍa Mācināyanimgāru, his mother, Rudrasānī and his master, Kāpayanāyanimgāru, and gifted 1 aḍḍa of land behind the Dēvarakunṭa in Pallalamarri to that god. Kāpayanāyanimgaru is given titles like Āndhrades-adhīsvara, Anumanaganṭi-puravār-ēsvara, Cōdarājya-sthāpan-ācārya and Kāncī-rakṣhapālaka.⁴³
- 5. Nāmi Reḍḍi gifted 19 houses inside the fort of Pillamarri to the Sthānapati and 18 musicians, dancers etc., of the Nāmēśvara temple.44
- 6. A gift of 5 martus of land was made for the maintenance of a choultry on the bund of the Erakasamudramu wherein 15 people were fed daily, divided as 1 martu for the cook and 4 martus for maintaining the students and a further ½ martu for the supply of water for the calivandiri.

The identification of the temples mentioned in the inscriptions, summarised above, with those actually found in the village is a little difficult. The inscriptions mention a triple shrine containing Nāmēśwara, Kämēswara and Kācēśvara, a temple of Nāmēśvara, both built by Nāmi Reddi and a temple of Erakēśvara built by Erakasani, and other shrines like those of Vis'vanathēśvara, Aitēśvara and Erakēśvara on a tank bund, Bētēśvara and Erakēs'vara. Komarēsvara and the shrine of Tripurādēvī. these, the temple situated outside the village, is now known as the Somes vara temple, one single shrine is known as the Namesvara temple and the triple shrine as the Mukkantisvara temple. The Hyderabad Archaeological Department mentions the Somesvara, Rāmēšvara and Mundakatēšvara temples. "There is thus an obvious confusion. The Namesvara temple of today, which is a single shrine inside the village, must be identified with the Nāmēśvara temple built by Nāmi Reddi in S. 1124. The name Rāmēśvara given to it by the Hyderabad Archaeological Depart-

Erakeśvara temple—Pillalamarri

(to face p. 93)

ment is wrong. The triple shrine adjacent to it, now wrongly known as Mukkantis'vara is really the trikuta built by Nāmi Reddi for housing Nāmēs'vara, Kāmēs'vara and Kācēs'vara in S. 1117. The temple outside the village, now wrongly named the Sōmēs'vara must be identified with the Erakēs'vara temple built by Erakasāni in S. 1130. There are clear traces of vandalism in this temple, particularly on the four central pillars of the Mukhamantapa. The other shrines mentioned in the inscriptions cannot be traced.

THE ERAKĒŚVARA TEMPLE

This is a fine temple built on a double platform with three porches and a *vimāna*. It is a complete temple like the great temple at Pālampēt and commands a panoramic view of the entire neighbourhood (Pl. XXXIX-1).

The shrine is star shaped and contains a Mukhamantapa with porches on the east, north and south and the Garbhagrha and Antarāla in the west (Pl. XXXIX-2).

The Upapītha:

The upapītha or the lowest member on the elevation, is 4'6' high. It consists of upāna, broad patṭa, narrow recess, paṭṭa with semi-circular elevations, another recess, two broad paṭṭas, gaṭa, two narrow paṭṭas, tripaṭṭa, gaṭa, paṭṭa, recess and āliṅgapaṭṭikā with a semi-circular hanging at each end. There are three entrances on this platform in the east, north and south, each with a flight of seven steps guarded by an elephant's trunk on each side. This upapīṭha is 103'3' east to west and 100' north to south. At its top is a pradakṣīṇa, about 8' wide.

The Adhistāna

This upper platform is within the pradak sina mentioned above. It consists of upāna, paṭṭa, narrow recess, paṭṭa, paṭṭa with a row of semi-circular elevations, wide gaḷa, tripaṭṭa, wide gaḷa, wide paṭṭa and āliṅgapaṭṭikā with semi-circular elevations. It is 4' high and has three entrances in the east, north and south. The porches

There are two pials, one on either side of the flight of steps. Beyond is a $V\bar{v}d\bar{v}$ or parapet whose outer side is decorated with a band having a row of lotus buds, the gala cut into compartments each having a four petalled lotus and the top band containing a

row of semi-circular hangings. The sections of the $v\bar{v}d\bar{i}$ connecting the porches and the $Antar\bar{a}la$ are similarly decorated.

The walls

There is a short wall on either side of the Antarāļa projecting on the edges of the adhiṣṭāna. The outer side of each of these wall is decorated with the series—(a) projecting pilaster (b) recess with a mintature vimāna on a pilaster (c) projection with a pilaster in three sections (d) recess with a miniature vimāna on a pilaster (e) projection with a pilaster (f) recess with a miniature vimāna on a pilaster and (i) projection with a pilaster. The piece connecting this wall with the wall of the Antarāļa contains four projections with a pilaster each and three recesses between them, each with a miniature vimāna above a pilaster (Pl. XL-1.).

The outerside of each of the two walls of the Antarāla contains the series-(a) recess with $k\bar{u}ta$ - $k\bar{v}ta$ on two slender pilasters (b) projection with a pilaster in four sections and (c) recess with $k\bar{u}ta$ - $k\bar{v}ta$ on two slender pilasters.

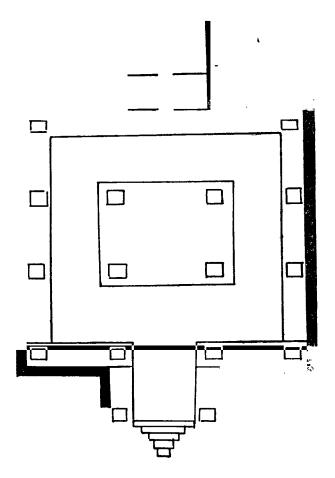

The outerside of each of the two side walls and the back wall of the Garbhagrha is decorated with five projecting pilasters, the central one being wider, and four recesses in between them each containing a $k\bar{u}ta-k\bar{o}sta$ on two slender pilasters. (Pl. XL-2). $Vim\bar{a}na$

The vimāna of this shrine is partly fallen. It appears to have been a catustala or four storeyed vimāna. Each tala is decorated with a distended pavilion-like vimāna in the centre in three sections with two vimānas on either side beyond. All these vimānas contain horizontal bands with a conical band in the centre of each tala. Probably it had a Nāgara sikhara. There is a sukanāsa projecting from the base of the vimāna in the front and covering the Antarāla below. On each side of this sukanāsa there is a broad arch containing a vimāna of flat horizontal bands and a round sikhara in three sections. There are nandis on the top of the sukanāsa in the front. The face of the sukanāsa has a wide gable on slender pilasters.

The Interior

The Mukhamantapa is reached through a stone entrance built at the end of the flight of steps in the Adhistana. The inner side of the walls of the $v\bar{e}d\bar{i}$ or parapet running on three sides

Plan of the Namesvara temple—Pillalamarri (to face p. 95)

is decorated with four petalled lotuses in compartments between pilasters. There are four carved pillars in the centre of the mantapa with full lotuses carved on the sides and underside of each beam. The underside of the ceiling above the pillars is cut into nine compartments, each with a lotus.

The entrance of the Antarāla is well carved. The base of each jamb contains the figures of two women, a dvārapālaka and a cāmaravāhinī. The portion above the jambs contains fret work frames and two pilasters with lotus creeper design. The verticals and cross beam of the dvāra are decorated with diamond cuttings and the lintel contains the figure of Gajalakşmī. The base piece contains a central projection with a niche on either side having the figure of a woman standing with her hands in anjalī. The architrave above contains a miniature shrine, a creeper, woman in dance pose, a broad shrine, a woman dancer, a creeper and a miniature shrine.

The entrance of the Garbhagrha is also finely carved. The pilasters of the jambs contain vertical rows of women in fine dance poses. The verticals of the $dv\bar{a}ra$ contain rows of linga on $v\bar{s}d\bar{\iota}$ and diamond design alternating. At the top of the walls inside are to be found a band of lotuses, a band of semicircular elevations and a band of lotuses. There is a plank shelf in the middle of each wall. The underside of the ceiling contains a lotus in $\bar{s}atk\bar{o}na$. In the centre of the Garbhagrha is a well carved $v\bar{e}d\bar{\iota}$ with a black granite linga in its centre.

THE NAMES'VARA TEMPLE

This temple, including the triple shrine and the small shrine of Brahmā, is situated within a compound inside the village.

This temple is more beautiful and more richly sculptured than the Erakēśvara. It consists of an open Mukhamantapa with a covered porch in the east and the Antarāla and Garbhagtha to the west (Pl. L-1. 1).

The Adhistana

The adhistāna of this temple is comparatively low and consists of upāna, recess, paṭṭa with a row of semi-circular elevations, recess, paṭṭa, recess, another paṭṭa with semi-circular elevations, recess, dvipaṭṭa, recess and alingapaṭṭikā.

Vēdī.

There is a low $v\bar{e}d\bar{\imath}$ or parapet on the adhistāna connecting the portico and the $A\dot{n}tar\bar{a}la$, enclosing the sides and front of the mantapa. This $v\bar{e}d\bar{\imath}$ is decorated with a gala containing compartments between pilasters having four petalled lotuses. There are four pillars on the portico part and eight on the mantapa part of this $v\bar{e}d\bar{\imath}$ supporting the roof.

Portico

This portico contains four plain pillars and an entrance finely carved. There are the figures of cāmaravāhinis and women in dance poses on the base pieces of the jambs and fretwork frames above them. The verticals and cross beam of the dvāra are decorated with diamond cuttings. The lintel contains the figure of Gajalakṣmī. There is a projecting canopy above the entrance. The two sides of the portico before the entrance have slanting back pieces.

Mukhamantapa

This mantapa is 29' 8" square and contains four finely carved pillars in the centre at the corners of a square elevation which contains a circular elevation inside it. All the four pillars are alike. Each of them contains - (a) a double simhalalāta at the base containing the figures of two women in fine poses (b) a male and a female deity with attendants on either side (c) three plain flat bands (d) two big simhalalātas (e) three pattas well ornamented (f) a row of women dancing holding branches in their hands (g) three ornamented pattas (h) patta with bead garlands (i) two plain flat bands (j) a row of women in dance poses (k) two plain pattas joined by a triangular elevation in the centre (1) a row of men kneeling and holding a three-stringed bead ornament (m) three plain circular bands joined by a central simhalalāta (n) three plain circular bands (o) a circular band with a row of swans (p) a circular band with the chain ornament (q) a plain circular band (r) a deep recess (s) circular band with swans in circles (t) three circular bands with bead garlands (u) a row of small simhalalātas (v) a band with lotus buds (w) an ornamented band (x) square phalaka with swans and bead garland design and a big sinihalalāta on each face and (y) roll capital with two women in fine poses on the underside and a protruding lion at the base. The inner and outerside of the beams above the pillars are decorated with

rows of miniature vimānas with flat horizontal paṭṭas in each tala and a round sikhara above and Nāgara vimānas alternately. The underside of each beam contains three lotuses. The underside of the ceiling above the pillars contains three squares, one within the other, with many compartments in interspaces. The eight triangular compartments contain lions riding elephants under a big simhamukha. At the angles of the innermost square are fine deity figures. Inside this square are ten concentric circles adorned with lotus buds. In the centre is a big bud containing the figure of Siva dancing in the Bhujangatrāsa pose.

The Antarāla

This is 9'8" x 7'9". The entrance is profusely carved. The base piece contains two big $vim\bar{a}nas$ in the centre and two on either side. The base of each jamb contains the figure of a $dv\bar{a}rap\bar{a}laka$ with an attendant on either side. There are fret work frames above. The lintel contains the figure of Gajalakṣmī. There is a projecting canopy above the entrance. The architrave above contains a row of three miniature $vim\bar{a}nas$ of flat horizontal bands and a round sikhara.

The Garbhagrha

This part is 9' 8' square and contains a granite linga set up on a $v\bar{e}d\bar{\imath}$, finely carved. The underside of the ceiling contains a satkona with a lotus in the centre.

The roof

The edges of the roof of the Mukhamantapa and the portico contain a row of miniature shrines with flat horizontal bands marking each tala.

The Vimana

The greater part of the *vimāna* is fallen. It seems to have been a *pañcatala* or five storeyed structure. Each *tala* contains the series - *vimāna*, *vimāna*, distended *vimāna*, *vimāna* and *vimāna*. There is a *sukanāsa* covering the *Antarāļa* below with a nandi at its top.

THE TRIPLE SHRINE

This shrine is adjacent to the Nimēśvara shrine described above. It contains a square Mukhamantapa with a covered portico to the east and three shrines in the south, west and north (Pl. L-2-2).

The adhistana of this temple is buried in the ground.

The portico contains four plain pillars, plain roof and a flight of four steps guarded by an elephant trunk on either side. Its doorway is plain.

There is a low plain parapet running on the edges of the mantapa. The mantapa is 24'6" square and contains sixteen pillars. There are four carved pillars in the centre with a circular and square elevation between them. The ceiling above these pillars contains a lotus in a $saik \bar{o}na$ and four $simhalal\bar{a}ias$ in the four corners on the underside.

The three shrines are alike and are comparatively plain. The outerside of their walls has no decorations. The Antarāla is 8'8"x7' and the Garbhagṛha 8'8" square. The base of the jambs of the Antarāla contains figure sculpture. The lintel has the figure of Gajalakṣmā. The architrave above contains a row of five vimānas with flat horizontal bands in each of the talas and a central conical band.

THE SHRINE OF BRAHMA

This is a small shrine with plain stone walls on three sides and two pillars in the open front. It has a narrow Antarāla with a plain entrance. The Garbhagrha beyond contains a slab with the image of Brahmā. This deity has three heads and four hands, the two upper hands upraised, the lower right in the dhyāna pose and the lower left holding kamandalu. There is a female deity, probably Sarasvatī, by his side. Both are seated on a swan.

ARCHITECTURAL FEATURES

The Kākatīya temples described so far are of great value for the study of the architecture of medieval Decean. They possess several peculiar and interesting features which are not to be found in the temples in other parts of Āndhradēśa. These temples constitute a distinct group and illustrate the evolution of an important style of architecture.

The main features of the Kākatīya style of architecture derived from the foregoing study of representative temples are as follows:—

The types—The plan of these temples shows an interesting variety. There are two general types of temples, the single shrine and the triple shrine.

The triple shrines are found at Panagal, Pillalamarri, Pālampēta and Hanumakoņda and seem to have been very popular during the Kākatīya period. These shrines are generally known as Trikūtas. The general pattern of these shrines consists of a central mantapa with a porch in one direction and a shrine in each of the other three directions, all facing the mantapa. The famous Rudrēs vara, Vāsudēvēs vara and Surya temple of Hanumakonda is the best and finest example of a triple shrine. One such shrine at Pillalamarri and the shrine at the western end of the tank bund at Pālampēta are similar in plan. The triple shrine at Panagal and shrine no. III to the west of the main temple at Palmpeta are similar in plan. In all these examples each shrine contains the Garbhagrha and the Antarāla. The triple shrine at Panagal and shrine no. III to the west of the main temple at Palampeta contain only the Garbhagrha and do not have the Antarāla before it.

Among the single shrines there is an appreciable variety. The great temple at Pālampēṭa is the best and the most complete and fully developed example of this type. It has the Garbhagṛha, Antarāla and Manṭapa with three porches on the three sides. The main shrine at Ghanapūr, five other shrines and the Reddigudi at the same place and the ruined temple at the eastern end of the tank bund at Pālampēṭa are of the same type. The Erakēśvara temple of Pillalamarri is similar. The next variety contains the Garbhagṛha, Antarāla and Manṭapa with a single porch. The Nāmēs'vara shrine at Pillalamarri, one of the minor shrines

at Ghanapūr and minor shrine IV at Pālampēṭa are good examples of this type. The third variety contains only the Garbhagṛha and Antarāla. Three shrines at Ghanapūr, two small shrines at the western end of the tank bund and minor shrine V at Pālampēṭa are examples of this variety. In the next variety, the Garbhagṛha is found behind an open manṭapa as in the case of three examples at Ghanapūr. There is only the Garbhagṛha in the last variety as in the case of one shrine at Ghanapūr.

The base—There are two varieties in the bases of these temples. Some temples contain a double base consisting of the Upapīṭhā with a broad pradakṣiṇa at its top and the Adhiṣṭāna built above it inside the pradakṣiṇa. The triple shrine at Hanumakoṇḍa, the Erakéśvara temple at Pıllalamarri, the main shrine at Ghanapūr and the great temple at Pālampēṭa are good examples of this variety. All the other temples have only a single base, the Adhiṣṭāna.

Walls—The architects of the Kākatīya period used several new devices for decorating the outer side of the walls of the temples. They did not convert them into picture galleries as is the case with the Hoysala temples. Nor were large spaces left with a pilaster here and a niche there as is the case with the Pallava and Cola temples. These architects spread the decorative members uniformly on the wall space and thus secured balance and elegance. The walls of the Kākatīya temples do not have pronounced angles and returns, projections and curves so as to form a stellar plan. The part with the Garbhagrha and Antarāla inside is ssentially rectangular. A few projections have been added on to the plain surface so as to create an alternation of projections and recesses. The central projection is invariably broader and where there are two of them, one contains a miniature shrine as is the case with the triple shrine at Hanumakonda and three such shrines in a vertical row as in the case of the great temple at Palampeta. In some cases, the projections contain, at the base of the pilaster in it, either a kosta or a sala or a miniature shrine of the Nagara Order as in the case of a minor shrine in the compound of the great temple at Palampeta. The recesses contain mostly a miniature vimana of horizontal bands on a pilaster as in the case of the triple shrine at Hanumakonda and the great temple at Pālampēta, the same type of vimāna under a creeper as in the case of the main temple at Ghanapur

and $K\bar{u}ta-k\bar{o}sta$ as in the case of the Erakesvara temple at Pillalamarri. The projections on the walls of the great temple at Pālampēta contain a $s\bar{a}l\bar{a}$ on two slender pilasters with one slender pilaster on either side. There is only one temple whose walls are plain i.e. the shrine at the eastern end of the tank bund at Pālampēta.

The roof—Another peculiar feature of the Kākatīya temples is a row of miniature $vim\bar{a}nas$ of brick found on the edges of the roof. These are found in the Erakēśvara and Nāmēśvara shrines of Pillalamarri and the triple shrine at Panagal. These rows of $vim\bar{a}nas$ are similar to the series of $K\bar{u}ta$. $Pa\bar{n}jara$ and $S\bar{a}l\bar{a}$ found in similar places in Pallava temples and the *chunchu* of the Vijayanagara times.

Pillars—The pillars in the Kākatīya temples are of two broad varieties, plain and decorated. The pillars inside the mantapa of the great temple at Palampeta and the triple shrine at Hanumakonda are of black granite and lathe turned. They are highly polished and decorated with various geometrical and bead designs. The pillars in the mantapa of the temple of Palampeta contain fine figure sculptures, both secular and religious and scenes from the epics. The pillars in the other temples and shrines are of sand stone and mostly plain though in a few cases there is figure sculpture of a high order. In two cases, the great temple at Pālampēta and the main temple at Ghanapūr, there are short pillars located above the vedi on the adhistana and supporting the roof above, which are remarkable. They contain diagonal brackets with the figures of lion and elephant and beautiful women in attractive dance poses. These brackets with female figures correspond to the madanika brackets of Hoysala temples but for their plasticity and dynamism they are reminiscent of similar figures from Sanchī and Amaravati.

Vimānas

The *vimānas* of these temples are peculiar. They are not of the curvilinear variety of the Early Cāļukyan temples of northern Karņāṭaka and Āndhradēs'a. Nor do they have horizontal rows of diminishing size containing the series- $k\bar{u}$ ṭa, $s\bar{a}$ la and $pa\bar{n}$ jara as is the case with the Pallava and Eastern Cāļukyan temples. They contain rows of either distended $k\bar{u}$ ṭas and $s\bar{a}$ lās or miniature $vim\bar{a}nas$, narrow and wide, the former occurring in the place

of the $k\bar{u}tas$ and the latter in the place of the $s\bar{a}l\bar{a}s$. The different talas are not clearly marked and the entire structure looks like a pyramid with decorations on the surface. The principles of verticalism and horizontalism have been harmoniously balanced in these $vim\bar{a}nas$. Another distinguishing feature is the presence of the $sukan\bar{a}sa$. This member is generally added at the front base of the curvilinear $vim\bar{a}nas$ of the Early Cāļukyan temples in Andhra and northern Karņāṭaka and also before the $N\bar{a}gara$ and $V\bar{e}sara$ $vim\bar{a}nas$ of diminishing tiers found in northern Karṇāṭaka. The addition of the $sukan\bar{a}sa$ to the $vim\bar{a}nas$ of the Kākatīya temples is peculiar.

Miniature vimānas

Minature vimānas are a popular architectural device used widely in the Kākatīva temples. They are found in recesses on the outer side of walls, on the outer side of the low vedis raised above the adhistanas, on the architrave above the upper beam and canopies of the entrances of the Antaralas and Garbhagrhas and in a few cases on the entablature above the beams of Mukhaman-These miniature vimanas contain from five to nine talas of horizontal bands of diminishing size and have some times a conical band, either plain or decorated in the centre of the front They sometimes contain an ayatasra part above the gala. They are crowned by sikharas which are either four faced and belong to the Nagara Order, or are round or amalaka shaped and belong to the Vēsara order. They are single vimānas in most cases but in others they are in three sections one emerging out of the other. It is evident that these are not mere docorative devices. but are actual miniatures of existing vimanās because the latter are found above several miniature shrines in the Kakatīva temples.

Miniature shrines

These are found extensively in Kākatīya temples. In each case the shrine is complete. It has a canopy and a low parapet with an opening in the centre in the front. There is a Garbhagrha beyond with a lotus on the underside of its ceiling. There is a kapōta above the walls and a vimāna of horizontal bands with a Nāgara or Vīsara sikhara above. In a few cases, there is no sikhara and the vimāna ends with the phalaka. Such shrines are found on the side walls of the Antarālas, on the architrave above the entrance of Garbhagrhas and as in the case of the triple shrine

at Hanumakonda and the great temple at Palampeta on the outer side of the walls of the Garbhagrha.

Carved entrances

Another interesting feature relates to the dvara of the Antarāla. This dyāra is fixed in a large and wide frame consisting of the wall portion, pillars, pilasters and jambs. All these are fully sculptured. There are fret work frames with holes set vertically above the base of the jambs in order to let in enough light. In the temples of other styles the $dv\bar{a}ras$ are located in the centre of walls which are plain or decorated. Another feature relating to these $dv\bar{a}ras$ is the projecting canopy above the cross beam. These canopies contain as many curves as there are in the padi below. The architraves above the dvāras are equally remarkable. In the bigger temples, like the triple shrine at Hanumakonda and the great temple at Palampeta and the main temple at Ghanapūr, this portion found above the Antarāla is like a frame with two makaras at the extremities with the upper edge cut into a number of creeper arches, with a dominating deity figure in the centre flanked by figures of minor deities or humans. The portion above the cross beam of the dvāra of the Garbhagrha contains a row of miniature shrines or vimanas.

Minor Shrines

Another peculiar feature of these Kākatīya temples is the setting up of miniatūre shrines for minor deities on the $v\bar{e}d\bar{i}$ located on the edges of the mantapa and above the adhistana. Such shrines are found in the great temple at Pālampēṭa and the main temple at Ghanapūr.

Subsidiary shrines

The major temples like those at Ghanapūr and Pālampēṭa are surrounded by a cluster of minor shrines. There are several of these both inside and outside the compound of the great temple at Pālampēṭa while at Ghanapūr eighteen of such shrines are located on the four sides of the main shrine.

Other features

There are some other features characteristic of the architectural style of the Kākatīya temples. Plank shelves in the walls of the Garbhagrha and finely carved canopies above the $v\bar{e}d\bar{i}$ containing the linga are features not found in the temples of other styles. Similar is the case with the moon stone found before the entrances of Antaralas and Garbhagrhas. The $v\bar{v}d\bar{\imath}$ on the edges of the mantapa with its outer side decorated with figure sculpture and miniature $vim\bar{a}nas$ adds grandeur to the interior.

Thus the $K\bar{n}$ katīya temples possess numerous new features and constitute a group by themselves.
